THE OLIVER CAFE

PREMIER OF ALBERTA TO BE GUEST OF BOARD OF TRADE

Premier J. E. Brownlee

Who is to be guest extraordinary of the Crossfield Board of Trade at a luncheon Wednesday evening July 20, and the Board is extending an open invitation to everyone to come and bear their honored guest.

Dog Pound Celebration Wednesday, July 27th

The 26th annual Celebration and Stampede will be held at the old stampede grounds, Dog Pound, on Wed., July 27.

The program consists of a Stampede for local riders; horse racing, baseball tournament, softball, athletic events for young and old. A bowery dance during the afternoon and night.

Bring the whole family and the lunch basket. Admission: Adults 25c, children free.

Fine Sample of Wheat Brought In To Chronicle Office

Everett Bills brought into The Chronicle office a few days ago, an exceptionally fine sample of wheat, which measured three feet in length and is headed out. Mr. Bills has 200 acres of this grain and 600 acres that is not as far advanced. Providing that we do not get hail or frost, many farmers are looking for a 40 bushel crop.

An 18 Cent Cow

The Barhead News tells the following incident:

Chas. Boehler shipped a cow to the Edmonton stockyards and the transaction resulted as follows: Weight 860 lbs.; price 75c per hundred pounds; value of cow, \$6.45. But Mr. Boehler did not get a cheque for \$6.45. There were deductions as follows: Insurance 20c; stockyard 75c; brand reading 10c; commission 90c; trucking \$1.30; exchange on cheque 15c, making a total of \$6.27, which subtracted from \$6.45 left 18c—the full amount received for the cow.

Death of W. M. Stafford

On Monday morning Mr. C. C. Stafford received word of the death of his father at San Diego, Cal. at the age of 84 years and 5 months.

The late Mr. Stafford came to Crossfield in 1905, and bought land east of town. He returned to Washington that year and came back in 1910, making his home here until 1913, when he returned to Spokane, but was a yearly visitor here until 1917, when he moved from Washington to San Diego, where he has since made his home. Mr. and Mrs. Stafford celebrated their golden wedding in 1917. Mrs. Stafford predeceased her husband in 1919.

Mr. Stafford will be well remembered by a large number of our readers who will regret to learn of his passing.

The Women's Guild of the Church of Assumption are holding a garden party on July 27th at the home of Mr. and Mrs. Bartlett, 6 miles south and half a mile west of the highway.

A real treat is in store for all, so fill up your cans and come along and make this an afternoon long to be remembered.

Premier J. E. Brownlee has accepted an invitation from the Board of Trade to a Banquet to be held in his honor in the U. F. A. Hall on Wednesday evening July 20th, commencing at 6:30.

All members and also non-members are invited to bring their wives for this special event. Those wishing to attend are requested to give their names to the Secretary not later than Tuesday noon next.

To Visit Farm Homes

Members of the Board of Trade will accept the standing invitation of Mr. Howard Wright to visit his farm, starting from Crossfield at two o'clock sharp. All members are asked to turn out and accept this invitation.

After leaving Mr. Wright's farm, the delegation will journey to the home of Mrs. Arnott to inspect her garden. Mrs. Arnott is a noted horticulturist, having won many prizes at the different horticultural shows in the Province.

Remember the date—July 20th. Cars will assemble at the park at 2 o'clock sharp, leaving at 2:15 for the drive to the Wright farm, and returning to Mr. and Mrs. Arnott's. It is expected to arrive back in Crossfield at six o'clock and finish up what promises to be a very enjoyable afternoon by attending the banquet in honor of Premier Brownlee at 6:15.

We note that our School Board in advertising for a Principal has stated that preference will be given to a married man.

This is commendable in our opinion, and we venture to say, in accord with the opinion of the people of Crossfield generally.

We were unfortunate to be able to retain the services of our late principal for so short a time; as both parents and pupils were very well satisfied with him.

It is in no way a reflection against any one of our former principals to advertise for a married man. When a man is married, then it stands to reason that he will wish to make his home where his living is made. This, in turn, means some return—in business transactions—to the community in which he resides.

After all the interests of a single man are apt to be elsewhere. He feels free to come and go, and his influence is necessarily, not a lasting one.

Many of us older persons look back with a measure of respect to the memory of the old master of the school days of our youth, and he was always as much a part of the community as was the old town hall, or village pump, or some other historic edifice. He was a man looked up to by the respectable, and dreaded by the proverbial aspiring Huck Finn of the village. This can not be said of a large number of our teachers of today, who are, frequently, transients, using the teaching profession as a stop-gap for some other course. The principal of the school should be, first and last, a teacher.

In conclusion, we would once more emphasize that this is in no way a reflection on any one of our past principals, but merely a commendation for our School Board's views in the matter.

Ray James lost five head of horses in a fire which destroyed a sales barn and forty head of horses at Edmonton on Sunday night.

The Crossfield Legion held their annual picnic in the park on Wednesday afternoon. A full report will be given in next week's paper.

T. R. Jopling, well known wheat grower of the Champion district, is visiting in town this week the guest of his old friend Tom Tredaway.

Win a Shetland Pony

We are participating in "The Happy Family" Popularity Contest.

Every cent spent in this store entitles you to one vote. Ask your friends to help you win a prize.

The Girl and Boy having the most votes on September 30th will each be given a

Beautiful Shetland Pony and Saddle.

Many other prizes such as Bicycles, Kodaks, Wrist Watches, Etc.

100 PRIZES IN ALL

Listen to "The Happy Family" over CFAC and learn how you can earn extra votes.

The 40th Anniversary of "SALADA" TEA

Finest quality for 40 years
has built the largest sales in
North America.

Ourselves.

Bruce Barton, the well known author and magazine writer, has proposed the toast: "To the only folk who can make us or break us—Ourselves." And he quotes the saying of Carlyle: "The world's being saved will not save us; nor the world's being lost destroy us. We should look to ourselves."

The truth of these statements, differently worded but meaning exactly the same thing, cannot be gainsaid. The biggest factor in the world now, as always, is the individual. No man is actually down and out, defeated, unless and until he himself admits defeat. Furthermore, more people are destroyed by prosperity than by adversity; more people fall to grasp and enjoy the realities of life when the gods are showering them with riches or other gifts than when they are faced with difficulties and confronted with seemingly unsolvable problems.

It is then people begin to call upon latent powers they possess. William James, in his essay on "Vital Reserves," pointed out that underneath our daily store of strength and courage, all of us have reservoirs that are tapped only by emergency. We are all able, under the test, to surprise ourselves with an unsuspected capacity to be and do more.

It is that capacity which is our greatest asset. It is our hope in the present and for the future. It is ours to employ now.

The writer is acquainted with a man resident in one of our prairie cities who lost his position over a year ago. He has a bed-ridden wife not only to support but to care for. He is not an educated man, and prior to losing his position received only a small salary. Did he despair and call upon the Government to put him "on relief"? No. He called upon his own reserves of strength. Although he had no experience, he got a job painting a garage. This led to other small painting jobs. Then at Christmas time he got work soliciting orders on a commission basis. When spring came he hunted up garden work to do. Thus he keeps going. He is seldom idle because he is willing to take on any kind of a job, no matter how humble. And when you meet him he always has a new joke to tell. He goes whistling on his way, according to accept Government or municipal relief, always looking forward to better days that must inevitably come, and in the meantime keeping his head well above water. He is a bigger, better man than ever before; has maintained his self-respect and kept his courage, and, in the days to come, will command a better position than any he might have secured had "hard times" not descended upon him.

This is a very simple illustration of a very ordinary individual. Nevertheless he has and is displaying the spirit of a hero. Yet he possesses nothing that each and every person has not got, namely, a reserve of strength, of courage, of determination, to call upon in times of emergency. But the important thing is—he called those reserves into action. Too many of us fail to do this. We hesitate, we drift, we refuse to use the powers lying latent in us, with which we have been endowed. In a word, we have not faith in ourselves, and without that faith anything that others may do for us will fall far short. Such people will come out of the present time of difficulty weaker and less well equipped to take advantage of the opportunities which the future will offer to us.

Let us put ourselves to the test. We have been tempted about; we may be gasping, but if we are strong of heart and keep on we will get out "second wind." A race is never lost until it is over; we always have a chance to win until the tape at the finishing line is definitely broken. Our success or failure depends, not on the other fellow, but on ourselves.

Fast Ocean Travel

Canada Now Only Week-End Journey From England

Canada is now only a "week-end's journey from England," thanks to the record-breaking crossings of the Atlantic by the C.P.'s "Empress of Britain," says Viscount Rothermere, famous British newspaper magnate. Viscount Rothermere declares that the interval between the time the "Empress of Britain" passed Bishop's Rock lighthouse, off the Scilly Islands, and the time she reached the entrance to the Strait of Belle Isle, was only 73 hours and 53 minutes.

"The passage of the north Atlantic was made with only two nights spent out of sight of land," declared Viscount Rothermere's message, "after which the rest of the journey has been through smooth land-locked waters."

An Imposing Monument

Prince Of Wales Will Dedicate War Memorial In France

One of the most imposing war memorials on French soil that which is to be dedicated by the Prince of Wales at Thiepval, on the Somme, next March. This monument, which is nearing completion, will be composed of triumphal arches 140 feet high, and only five feet less in breadth. On the pillars will appear the engraved names of 73,367 British officers, N.C.O.'s and men.

The average annual income of physicians in the United States, as revealed by an American Medical Association survey, is \$9,074.

All Her Children Were Troubled With Diarrhoea

Mr. J. J. Bickert, R.R. 3, Enderby, B.C., writes:—"Last Summer all my children were troubled with diarrhoea, and were so bad I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry, so I got a bottle, and after a couple of doses you should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I said it the only one that relieves so easily and quickly."

Established For Centuries

History Of Many English Business Firms Is Interesting

Among the historic business firms of England is one which claims existence when the flames demolished medieval London. This is Hedges and Butler, wine merchants, whose original lease forbade the shooting of snipe in that thoroughfare and who numbered Pitt, the Duke of Wellington, W. E. Gladstone, and Lord Bessborough among their customers. Yet another is G. W. Scott and Sons Limited, who made hoops for the dresses of the fashionable ladies in the days of Queen Anne and wicker frames for the hearthside of the Guards at Waterloo. Founded in 1693, Birch and Co., have since provided all the banquets for the City Corporation, and for 200 years have fed every crowned head and important man in Europe. The business remains famous for turtle soup and punch made from age-old recipes, and the fine window of their original shop now reposes in the London Museum. Also founded in 1690, Grosvenor, Chas. and Co., were the first stationers to the Bank of England. Queen Anne, a famous gourmet, liked the relishes made by Crose and Blackwell, into which firm Grosvenor's chief, Quallotti, entered and invented the pickle, Piccalilli. In 1783, it is interesting to note now that the tea duty in England has just been removed. Mr. Richard Twining, of R. Twining and Co., the tea merchants, was called in by Pitt to discuss the removal of the tea tax, a step which was taken. Two hundred and twenty-two years ago the Sun Insurance Office began business, and in 10 years issued 20,000 policies, insuring about £10,000,000, an enormous sum in those days. Telescopes made by each of Dollond and Alcock, and Alcock, were used by Nelson, Wellington and Napoleon. To C. T. Brock and Co., the firework manufacturers, belongs the distinction of carrying on an illegal trade for 155 years, firework making not being actually legal till 1875.

High Tariff Walls

Action Of U.S. Provokes A Severe Blow To Canadian Agriculture

The exports from Canada to the United States of principal commodities, such as are produced on Canadian farms, or manufactured directly from such farm products, during the month of May amounted in value to \$590,195, as compared with \$523,740 in May, 1930, and \$504,898 in May, 1921, according to the Dominion Bureau of Statistics.

The high tariff walls erected by the United States, culminating in the Hawley-Smoot tariff in June, 1930, were a severe blow to Canadian agriculture, making the export to that country of many commodities practically impossible.

During the eleven months ending May, 1932, the export of such commodities to the United States totalled \$8,632,428, as compared with \$44,078,930 in the same period of 1929-30, and \$171,492,982 in the eleven months ending May, 1921.

With a duty of 42 cents per bushel on wheat, the export of Canada's chief agricultural product to the United States declined from \$101,050,200 in eleven months of the crop year 1929-30, to \$2,490,774 in 1931-32. Three cents per pound on beef cattle has caused a drop from \$21,182,324 to \$617,745.

Three dollars per head on sheep brought the export down from \$1,566,213 to \$628. Butter at 14 cents per pound fell from \$2,289,220 to \$145,946, flaxseed at 65 cents per bushel from \$4,763,311 to \$573,709, potatoes at 75 cents per 100 pounds from \$6,557,031 in eleven months of 1929-30 to \$459,449, hay at 35 cents per ton from \$2,269,295 to \$115,979, etc. Of course, lowered prices have also had some effect upon the values.

Internally and Externally It Is Good. The crowing property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints, as well as externally. For sore throat, croup, whooping cough, pains in the chest, cold and many kindred ailments it is the best medicine. A bottle of it costs little and there is no loss in always having it at hand.

Evidently Not Known

The case came before a London coroner the other day of a man who "with an income of \$10,000 a year, had not a friend in the world." It cannot have been generally known that he had an income of nearly \$3,000 a year.

And now it is reported crocodiles do not cry. Next thing we know someone will muster enough courage to declare there is no such thing as a weeping willow.

Food losses no nutritional value in canning, scientific experiments indicate.

Using 'Planes In Stampede

Wild Horses To Be Rounded Up From Air

Klamath Falls, Ore., plans the mightiest wild horse drive from the air. Three airplanes will dip low over the plateaus and passes, set the wild bands running, head them at the turns and finally stampede 2,000 of them. It is expected, into a gigantic trap corral in the lowlands. The finest stallions and mares, it is promised, will be allowed to escape again to the hills, but most of that vast catch will be slaughtered—for chicken feed. The automobile could replace the horse in man's heart, but not even the auto could chase him off the map. Only thunder-birds swooping down from the sky can stampede them into poultry bait.—Christian Science Monitor.

Muskeg Has Its Use

Possibility It May Be Manufactured Into Wall Board

Muskeg, the moss-like substance that covers thousands of miles of Canada's treeless north country, has at last found a use. An inquiry recently received by the Board of Trade at The Pas, Manitoba, may lead to a tramload of muskeg being shipped to the west coast for use in the manufacture of wall board.

Sitting in the midst of millions of tons of muskeg, long believed valueless, officials of the board were amazed when they received the letter asking about the possibility of buying a dozen carloads or so. Negotiations are now under way for shipment and the Board of Trade is looking into the possibility of getting a factory to locate there and use the material.

Asthma Brings Misery, but Dr. D. K. Kellogg's Asthma Remedy will replace the misery with welcome relief. The bad smoke or vapor it reaches the very innermost recesses of the bronchial passages and soothes them. It relieves the cough and soothes the throat. If you know as well how this remedy would help you as do thousands of grateful users, there would be a package in your home tonight. Try it.

Tracherous Police Dogs

Bringing These Animals Into Canada Looks Like Mistake

The Stratford Beacon-Herald in connection with a case of a dog being bitten in Toronto by a police dog, observes that breeders of dogs are agreed that it was a mistake to bring this dog to Canada. It has not the background and tradition of the Collie, the bulldog, the setter, St. Bernard, Newfoundland or any of the other well-known breeds of dogs to which we are accustomed. The police dog is a wild animal, and tracherous in the sense that he cannot be trusted not to take a bite at any moment. The breeding of these dogs should be discouraged, especially for city life.

The Man Who Walks

Cannot Afford To Relax Vigilance For A Moment

It must be admitted that the pedestrian today has a grievance. He must go about his lawful occupations, if society is to exist, and to do that he must frequent the streets and roads. Yet he is nowadays condemned to do so at the peril of being killed or maimed if he should be guilty of one error of judgment or one lapse of vigilance. He must live in a jeopardy comparable to that of the troops in the front-line trenches during the War.—Morning Post, London, Englon, England.

Douglas' Egyptian Liniment, always quick, always certain. Stops bleeding instantly. Cauterizes wounds, prevents blood poisoning. Splendid for muscular rheumatism.

Two poems and a complete story, including altogether 8,100 words, have just been written on the two sides of an ordinary postcard. This record feat was performed by a resident of Munich, Germany.

It cost nearly \$12,000,000 to supply London with water in the last 12 months.

Sick From Heat

"Baby's Own Tablets are excellent for children's summer complaints," writes Mrs. M. E. Conne, Brantford, Ont. "Best of all children's remedies for summer complaints," writes Mrs. Geo. Walker, Thomas, B.C. "Equally effective for teething, fever, colic, constipation. Pleasant as candy—and absolutely SAFE."—A package, 24c.

Dr. Williams' BABY'S OWN TABLETS

Your Children

will thrive on
Christie's pure
Arrowroots

For the tiniest babies... for older children... for growing boys and girls... there is nothing more delicious and nourishing than Christie's Arrowroots. No substitute is good enough.

Christie's Arrowroots

Miracle Recorded In Church

Mosaic Panel Depicts Basket Of Bread And Two Fishes

A fourteenth-century church, built during the reign of the Emperor Constantine the Great, has been uncovered near Tiberius, on the way to Capernaum. This church commemorates the miracle of the loaves and fishes, performed by Jesus on the shores of the Sea of Galilee, and the actual stone said to have figured in the Gospel narrative as the boulder on which He stood has also been found in the centre of the church, where it presumably lay beneath an altar. Behind the stone a wonderfully designed mosaic panel was found depicting in vivid black, red and yellow, a basket, several loaves of bread, and two fishes. Although buried beneath dust and rubble for about 1,600 years, and only a stone's-throw from the sea, the mosaic shows no signs of erosion, and the colors are well preserved.

Good Service For Citizens

Toronto Health Department Furnishes Tablets To Purify Water

A notice published in Toronto papers says that free tablets for the purification of water can be obtained from the city health department by any citizen. These tablets are recommended for use when going on picnic or on camping trips where there are chances of having to use water of questionable purity. The tablets will purify water and make it fit for drinking in a few minutes.

That is a useful service for any city to give its people. People who go away and who use water of which they know nothing at all are running risks, and a tablet which will eliminate this risk is a friendly thing and a good travelling companion.

Miller's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring worm troubles to an end. They are a strengthening and purifying medicine, correcting the disorders of digestion that the worms cause and imparting a healthy tone to the system most beneficial to development.

Game Fish In North

Transferring Speckled Trout Along Hudson Bay Railway Line

There is a possibility that game fish of the speckled trout variety, will be transported from the streams along the Hudson Bay Railway to the Clearwater Lake summer resort and other adjacent waters by airplane or tank cars, so the lakes may be stocked for sportmen.

E. H. Stevenson, inspector of fishing, who is in Churchill, is at present engaged in making a survey of the brooks along the bay line. It is his intention to pick out suitable places for the capture and keeping of fish until transferred to other waters.

Reducing Coffee Surplus. Slightly more than 263,000 sacks of coffee were destroyed by the Brazilian government in a recent week. This brings the total destroyed since policy of reducing the surplus production was adopted to 7,978,386 sacks.

With good management there is still money in farming. Fifty years ago an Ontario farmer paid \$500 for a farm and last week he sold it to a golf syndicate for \$500.

Schoolboy's essay: "The defendant's lawyer made a motion for a change of menu."

New Association Has Been Granted Charter

Body Organized In Ontario For Pro- tection Of Pedestrians

Did you ever jump for your life as a 'big bulking brute of an automobile driver bore down on you and when he honked desperately, did you ever mutter: "There ought to be a law!" Well, someone else did. Hence is born the Pedestrians Rights Association of Ontario, granted a charter by the Ontario Government.

Wary of the spectacle of seeing their fellow humans on momentary pedestals and the next cherubim, a group of citizens has founded the association. Head office will be in Ottawa, and the object to protect pedestrians "from all kinds of traffic injuries on streets and roads, especially those arising from motor and other vehicles, and from faults, abuses and infractions of the law by their drivers and owners." It has not been announced just how the pedestrians are to be protected.

British Exhibits Are Coming Via Churchill

Directorate Of Grain Show Learns Plans Being Worked Out

Exhibits of British manufactured goods to be shown at Regina next year during the World's Grain Exhibition and Conference and Regina exhibition will arrive via Churchill. Plans with this object in view are being worked out, members of the directorate board of the Regina Exhibition Association have learned.

A special committee representative of the exhibition association, the city council, the board of trade and the World's Grain Exhibition is at work making plans for the British trade exhibit and have received gratifying response from British manufacturers with whom they are in touch. The exhibit will be housed in the present Confederation Building.

The Smiths Still Lead

Numerical Supremacy Still Maintained By Forces Of This Nation

The most prominent family in the United States apparently maintains its numerical supremacy in about all departments of human activity. Not only does it use more telephones, but it holds more public offices, according to recently published evidence. In the second edition of "Who's Who in Government," which has just appeared with biographical data on more than nineteen thousand public office holders in the United States, the Smith family is the largest on the public payroll.—The Journal, Providence.

Increased Resort To London Of Canadian Borrowers Shows New Financial Trend

Successful flotation of two provincial bond issues in the London market is accepted by New York bankers as a forerunner of increased resort by Canadian borrowers to the London new issues market "during the current period of financial strain and unsettled exchanges," says the New York Herald-Tribune.

The paper refers to the placing of British Columbia's \$1,500,000 of 5s in London in May, which was quickly oversubscribed at 90, and of \$1,000,000 Alberta 5s recently at 85.

"The new trend," says the paper, "is somewhat of a tribute to the London new issues market, which recovered its poise last December."

"It remains the opinion of almost all competent authorities that the Canadian dollar will be eventually re-established on a parity with that of the United States, notwithstanding the present discount of nearly 13 per cent. on Montreal funds in New York. The close inter-relationships of United States and Canadian business interests, and the large aggregate of Canadian gold bonds, held in this country, are considered ample assurance of eventual exchange parity. Nor is it thought that such parity will be difficult to achieve or maintain in a normal world."

"It is accepted here that the Canadian borrowing in London had the tacit approval of the highest banking authorities in England."

"This assumption is justified, since the effect on the exchanges accords with impressions prevalent here in regard to London financial policy. All exchange transactions between Montreal and London are mediated by New York. Canadian borrowing in London means, therefore, that additional pressure will be exerted to depress the British currency unit in terms of the United States dollar, while a favorable effect will be exerted on the Canadian unit in terms of the dollar."

"That London is averse to any substantial rise in sterling has been shown by the establishment of the stabilization fund. The effect of Canadian borrowing in London coincides with the operation of that fund, and it is therefore assumed that encouragement will be given the flotation of Canadian bond issues in London."

Sounds Reasonable

Establishing City Man On Farm Might Not Pay

A prominent citizen of Pennsylvania, realizing that unemployed city workers have no means to establish homesteads in the country, proposes that the State should finance them in the purchase of farms, stocking them with horses, cows, chickens and pigs, and supplying them with tools and seed. That kind of aid might be welcome to a genuine "back-to-the-land" who had been brought up in the country, but how can it benefit the man who has never known of life outside a city? He couldn't tell a couldn't tell a horse's crupper from its headstall, he is helpless when he seats himself on a milking-stool at a cow's flank, he has the vaguest idea or none at all as to the proper feeding and care of swine. Even the comparatively simple procedure of keeping a flock of poultry in good fettle is Greek to him. You might as well bring a discouraged farmer to the city and expect him to make a success of running a beauty-parlor or a high-class specialty shop.

Exports of beef from Alberta in 1931 totalled 190,000,000 pounds, according to the annual report of the Provincial Livestock Commissioner.

The United States imported 284,000 pounds of garlic last year.

"I believe all men are stupid."
"Oh, no. Some remain bachelors!"
—Buen Humor, Madrid.

W. N. U. 1950

To Protect Industry

Ask For Stiffening Of "Empire-Content" Regulations In Britain

British Conservatives want a stiffening of the "Empire-Content" regulations which stipulate the percentage of Empire labor or materials that must be contained in goods entering under the Imperial preferences.

The central council of the National Union of Conservative Associations, meeting in London, with 300 delegates present, unanimously passed a resolution demanding the government take steps to amend the regulations, which at present call for an Empire content of 25 per cent.

The resolution complained that at present United States manufacturers are able to use Canada and the Irish Free State as corridors for the export into Britain of goods mainly of United States origin, thus evading the general duties and defeating the object for which they were imposed.

American Railways Hard Hit

Net Loss Of 76 Millions In First Four Months Of Year

A net loss of \$76,489,492 during the first four months of the current year was shown in the net income of the principal Class I steam railways of the country, according to a tabulation of the Interstate Commerce commission based on reports of 164 Class I steam railways. This compares with a net income of \$899,610 for the corresponding period of last year.

The net loss for April amounted to \$20,682,727 compared with a net income of \$2,623,005 for that month in 1931.

A CHARMING LITTLE MODEL
THIS! YOUNG, Dainty and
VERSATILE

It can be carried out in a great many different fabrics. It all depends upon whether young daughter wishes to wear it for parties, "best" or everyday occasions.

For parties, taffeta, crepe de chine or chiffon is darling in pale blue, pink or daffodil yellow.

For simple "best," a crepe de chine print in light navy blue and white is cute idea as sketched. The yoke that merges into caplet sleeves is plain navy crepe. It's most practical.

Style No. 290 is designed for sizes 8, 10, 12 and 14 years. Size 8 requires 1 1/2 yards of 35-inch material with 1/4 yard of 35-inch contrasting. Red and white polka-dotted dimity with plain white, nile green lines with yellow and orchid and white checked tissue gingham with plain orchid gingham are striking combinations, truly French.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

GEORGE E. CARTER WINS PROMOTION

Succeeds George A. Walton
as General Passenger
Agent C.P.R.

George E. Carter, Assistant General Passenger Agent, Canadian Pacific Railway, is appointed General Passenger Agent Eastern Lines, with headquarters at Montreal, effective July 1st, according to an announcement by R. G. McNeill, Assistant Passenger Traffic Manager. He succeeds the late George A. Walton, who died on the "Empress of Australia," at sea, on May 18. The position of Assistant General Passenger Agent is now held by Mr. Carter.

This decision was reached in view of the need of economy during current business conditions, and requires the number of Assistant General Passenger Agents to two.

Mr. Carter's promotion to the highest position in the gift of the Passenger Department, follows a career already marked by steady advancement.

Mr. Carter entered the service of the C.P.R. as a stenographer in the Passenger Department at Saint John, N.B., on September 25, 1914. Shortly thereafter he enlisted for Overseas Service and was wounded on the Western front with the first Canadian Machine Gun Battalion. He subsequently became a member of the world famous Princess Patricia, the character of his service with that unit winning him a commission in the Imperial Army, from which he afterwards transferred to the Canadian Corps.

Returning from Overseas at the close of the War, he re-entered the Passenger Department of the Canadian Pacific at Saint John, N.B., and steadily worked his way upward through the ranks. He was transferred to posts of increasing responsibility at Quebec, and in turn was made Chief Clerk in the New York and Montreal offices of the Passenger Department. Mr. Carter also made a special instructional trip to Europe in co-operation with the Canadian Pacific Steamships.

He was made District Passenger Agent at Saint John on December 10, 1928, and Assistant General Passenger Agent in Montreal on May 1st, 1930. He is a member of the Traffic Club of Montreal, and of the Kiwanis Club.

Had the Makings
The tourist rushed into the village shop. "I want a quart of oil, some petrol, a couple of sparking plugs, a five-gallon paraffin can, and four pie tins."

"All right," replied the enterprising clerk, "and you can assemble 'em in the back room if you want to."

Tony Sarg, artist and puppet-master, lived as a boy in an English village which had no toy shop or store that sold gimcracks. The situation forced Sarg to make his own.

CANADIAN-UNITED STATES PEACE PARK DEDICATED

These photographs were taken when the Waterton-Glacier International Peace Park was dedicated under authority of the Canadian Government and United States Congress as a monument to 117 years of enduring peace and good-will between the two nations. Sir Charles A. Mander of England delivered the dedicatory address at the colorful ceremony and he is seen at the top, center, clasping hands of E. T. Scoyon (left), superintendent of Glacier National Park, and H. Knight (right), superintendent of Waterton Lakes National Park. The Peace park idea originated with the Rotary Club of Chatham, Alberta, and was sponsored by the Rotary Clubs of Canada and the United States. The lower photograph shows Chief Two Guns White Wolf adopting Lady Mander into the Blackfoot tribe as Princess Shining Star Woman (Ko-Ski-Ki-Na-So-Ya-Kee), following the ceremonies of dedication.

Weed Menace

Effective Method Of Securing A Clear Seed Crop

This is the time of the year when the weeds of the seed crop should be carefully watched among the most troublesome of which are the weeds Bladder Campion, Catch Fly, Couch Grass, Rib Grass, Ragweed, Ox-eye Daisy and Perennial Sow Thistle—and only by effective pulling methods can the best quality of seed crop be secured. As the Dominion Seed Branch points out, growers should police their fields carefully and be prepared to resort to liberal roguing where necessary in order to ensure that their seed crop will be free from impurities which too often render otherwise good seed of no market value whatever. Roguing, or pulling weeds by hand, before they have gone to seed, is the most effective method of making sure of securing a clean seed crop.

Expedition Into North

May Attempt To Locate Rich Gold And Silver Properties

Captain James C. Critchell-Bullock, of Vancouver, companion of the late John Hohny during his wanderings in the sub-Arctic barrens of the North West Territories, may lead an expedition into the north in an attempt to locate rich gold, silver and radium properties.

"Formerly was the original discoverer of the Great Bear Lake radium area," Critchell-Bullock declares. "During his wanderings in the barrens he made many other important ore discoveries, and before he died he turned over to me most of his samples, his diaries and his maps."

One of these samples, assayed recently in Vancouver, shows values of \$136,000 to the ton in free gold, Captain Critchell-Bullock said.

Prepared For Emergency

Grave Ready For Lighthouse Keeper Taking Up Duties In Bahamas

When a lighthouse keeper takes up his duties in the lighthouse of one of the far-flung Bahamas, he finds a grave of solid rock awaiting him. He knows that the "light" is all-important and another keeper could not take time off to dig him a grave. He also knows that because of the heat he will inhabit his final rock-hewn dwelling before sundown in the day he dies.

This novel "death insurance" scheme was explained in an interview by E. H. Sayer, resident engineer of the Imperial Lighthouse Service, on a foraging in Canada. He is in charge of the 12 Imperial Government lighthouses of the Bahamas.

A Berlin inventor has perfected a projector for throwing advertisements on mountain sides.

Eminent French Professor Declares There Is No Such Thing As The Gulf Stream

Requires Team Work

If Every Person Was Careful Fewer Accidents Would Occur

Last year 571 people were killed by motor vehicles in Ontario; 241 people lost their lives by drowning and there were 204 deaths caused by falls.

That makes a total of 1,738 lives that were snuffed out by what might correctly be called preventable accidents, or what in plain speech would be called carelessness or recklessness.

What that total will be this year, of course, remains in the lap of the gods, but judging by the fatalities already reported, it will contain a greater rather than a lesser number, unless people are prepared to give greater thought and consideration to this matter.

Schools are closed for the holidays and thousands of children are free, too many of them, to roam at their own sweet will. Will anything serious happen to them?

Surely it will, unless the parents and older people force into their minds the absolute necessity of being careful in the streets, on the roads, at the swimming hole and at other places dear to the heart of childhood.

But all the fatalities will not fall among the children, and very few will really be caused by them. One can rest assured of that fact.

What about the man or the woman who drives at thirty or forty miles an hour on the streets of a town, or at something approaching double that speed on the roads and highways leading and from those towns? Are they trying to prevent accidents, or have they even a thought of danger in their minds?

Contrary to a very general belief it isn't always the other fellow who is inviting an accident. Accidents have a way of happening in all places, not just in one, and there is no one cause for them, but many.

If taking a little more time and being a little more careful would help to reduce this amazing total of preventable accidents, is it not the duty of every man and every woman to give this time and care?

Hundred Acres Of Roses

Two New Varieties Yearly In Bohemia Gardener's Record

Blatina, in southwest Bohemia, was but little known to the outside world in pre-war days. Only the antiquarian interested in its late Gothic church, or the tourist informed of its delightful old castle set in the midst of a great and lovely park, would think it worth while to drop off there before passing on to the larger and historically more interesting towns of Pisek and Strakonice. But today it has become the end of an annual summer pilgrimage of nature lovers and others from all parts of central Europe. For there has been established by Jan Boehm a plant of over one hundred acres of roses.

To the horticulturist, Blatina is a constant source of reference, for Jan Boehm is a continuous experimenter, and his results are eagerly followed by experts in this part of Europe. He pelces upon the market two new roses each year. Some of his recent introductions include the Masaryk Jubilee rose, the "Bozena Nemcova," named after a famous Czech novelist of the nineteenth century and which is described as "a rose without a thorn," a "Briand-Panzerrose" and a "Krasna Uslavanka" rose of two colors.

In addition to his own species, Boehm grows all kinds of roses, German, French, English and Dutch. The fact that Blatina lies about 1,300 feet above sea level and is exposed to the sharp winds of the Bohemian Forest would have suggested to a less daring man that this was an impossible spot in which to cultivate roses. What has actually happened is that Boehm has produced roses which are of a hardy sort, insured to cold and well able to stand rough climate—Christian Science Monitor.

Keeps Business Moving

The head of one of the largest firms of cereal manufacturers announces that it is adding a cool million dollars to its advertising appropriation for the current year. The bulk of this appropriation will be spent with newspapers. And many people operating much smaller concerns still persist in thinking that advertising does not pay.

Raw silk exported from Japan last year weighed nearly 20 per cent. more than the 1930 shipments.

Professor Georges Le Danois

of the French Sea Fisheries Bureau says "there is no such thing as the Gulf Stream." This, says the New York Sun, is his ultimatum. He hopes "that this categorical statement will put an end" to the conjectures inspired by reports concerning the inconstancy of the river in the North Atlantic.

The suppression of the Gulf Stream by the eminent French oceanographer is a hard blow to romance. Nothing like it has been reported since grim science abolished the Sargasso Sea of adventure tales and condemned to death all those interesting colonies of hopelessly pent voyagers that were held captive in its entrancing west. The Sargasso Sea had a flora and a fauna of its own, each as rich as the discoverer's imagination; its human population was as diversified as the circumstances set by the story teller required.

The Sun reminds us that the Gulf Stream plays a different but not less interesting part in story. It is responsible for the cold, wet seasons that afflict the eastern coast of the United States and the northwestern coast of Europe. When strange fash appear, the Gulf Stream brings them; when familiar fash disappear, the Gulf Stream takes them away. Outside the Hydrographic Office—a strangely perverse institution so surprising that it refuses to be guided by scientists' reports—the principal function of the Gulf Stream is to change its course. Not a season passes in which its diversions are not recorded everywhere except on the official charts.

It is a fortunate thing that Professor Le Danois did not revoke the Gulf Stream while Benjamin Franklin was his Ambassador to France. Poor Richard was a firm believer in the great current, and he would have stood up for it. Even now there are those who, despite the finality of Professor Le Danois's pronouncement, will hope for its reinstatement. Perhaps it was a firm belief in the ocean when Professor Le Danois looked at the place where it should have been.

Tariff Pleasantries

U.S. Attitude Frets An End To Possibility Of Neighboring Trade

Colonel W. L. McGrew, president of the Canadian Chamber of Commerce, got a few things off his chest and on to the necks of the American Chamber of Commerce in convention assembled at San Francisco. Referring to tariff pleasantries between Canada and the United States, he says right out that the Americans started the game. The Smoot-Hawley Act is described as putting an end to fifty years of Canadian effort to trade with the United States. Furthermore, the newly threatened restrictions on Canadian lumber and copper exports come in for rough handling. It is not much good trying to do business with a people who appear unwilling to buy from us, although they sell us one-quarter of their exports, quoth the colonel. In the classic phrase, he is not arguing with the Americans; he is just telling them.—Montreal Star.

Bobby: "Daddy, a boy at school told me I looked just like you."
Dad (proudly): "And what did you say?"
Bobby: "Nothin'. He was bigger 'n me."

City traffic officials of Tokyo, Japan, are trying to find a way to decrease the great number of collisions between bicycles and automobiles.

Diamonds never occur in mass formation, always being found in single crystals.

The flying tank is a new fighting machine.

"Oh, I have forgotten my handkerchief! John, just run up and fetch it before the train comes in!"—Sundags-Bladet-Strik, Stockholm.

Mace Is Old War Club

Gift To Queen Victoria Going Back To Fiji King

Among the thousands of treasures in Windsor Castle is the war club of the former King of Fiji, which was presented to Queen Victoria 58 years ago when King Thakombau acknowledged to Sir Hercules Robinson the sovereignty of Great Britain.

This war club, by command of King George, is now to be returned for ceremonial use as a mace in the Fiji legislative council. When the Fiji king handed over the war club to Sir Hercules Robinson he "sent his love to Her Majesty," assuring the Queen of his devotion and the devotion of his people to her descendants. The king desired to give Her Majesty the only thing he possessed that would be of interest to her and as a further token of his submission he had devices of doves carved on the sinister knobs of the club.

Waiting Time Is Over

Prosperity Must Be Met Half Way

Frank J. D. Barnum, that Canadian optimist who confesses to having weathered three or four panics in his time, has no hesitation in saying that prosperity is now simply waiting for people to go out and meet it half way. "Don't keep on waiting; if both wait, we shall never meet," is the word he broadcasts in a communication to the press. "If all those who have money, and there are a sufficient number who have, would go out and buy freely as they did in 1929, the depression would be a thing of the past. Buy, build, repair and stock up now, and by so doing save thirty to fifty per cent.," is the word from the man who has been recently buying forest tracts in this country in order to save them for posterity. "And then advertise," he adds.

AN UNFORGETTABLE SIGHT

"English" Irishmen lining up at Bow Street, London, for registration as aliens when Mr. De Valera seeks the independence of Ireland. Among the famous celebrities are, left to right: Jimmy de Rothschild, Lord Moyn, Sean O'Casey, Lord Castlereagh, Lord Moyneham, Lord Carson, Sir John Lavery, Lord Murphy, Earl Beatty, Bernard Shaw, Lord Derby, etc.—Low in the London Evening Standard, London, England.

Shall Our Monetary

System Be Changed

(Continued)

An Analysis Of Several Of The Proposals Made

(By Major Strange)

(6) That Central Banks should exercise a greater control over credit so that in times of prosperity credit would be curtailed in order to prevent over-speculation and over-expansion of buying and production, and so that in periods of adversity credits would be more freely available.

(NOTE)—Some critics consider that this suggestion involves an over-straining of the workings of the quantity theory of money. (In a subsequent article a brief explanation of the quantity theory of money will be attempted.) Other critics ask, who would be wise enough to decide when to curtail or over-expand credit? and when prices are declining and persons are fearful of making financial commitments for a future which they cannot foresee—who, it is asked, would be brave enough to borrow and use the credit even though it were available?

(7) That the Canadian paper dollar shall be based upon "units of labour" instead of gold. This is exactly the proposal made by Karl Marx in 1848, although Marx saw clearly that there would be no end in deciding how the "socially necessary unit of labour" should be computed.

(NOTE)—Many socialists and Communists advocate this today. No competent economist, as far as we are aware, however, will agree to such a system of price determination as even remotely workable or possible.

(8) That the purchasing power of the Canadian paper dollar shall be based upon an index number of wholesale commodities instead of upon gold, and that debts should be repayable with dollars of the same purchasing power that they had when the debts were incurred. Which authority's index number would be chosen, and which commodities should be included in the make-up of the average, and how compensation of price would be made to correct over-production or deficiency in any one commodity, or how a surplus of any one commodity would be governed, is not clearly explained.

(NOTE)—The method advocated by some termed "managed currency" Whether any set of human beings have had sufficient wisdom with the management of money, or sufficient wisdom, to control either inflation or deflation, is a question which any solid metal as an anchor, is questioned by many astute men.

(9) That the bimetallic standard be instituted, using gold and silver as alternatives, which shall be exchangeable with one another, or for paper currency, at a ratio set by law.

(NOTE)—Every attempt in history has been made to set up bimetallic standards, but failure has been almost inevitable to function, resulting in the most prized metal of the two being driven out of circulation and hoarded, so that eventually only one of the two metals is left to serve as a standard and medium of exchange.

(10) That symmetrical should be set up, which means that both gold and silver, not as alternatives as in bimetallic, but tied together in definite proportions in metal bars, shall be used as the standard and that paper currency shall be exchangeable for neither gold nor silver, but only for bars of the metal unit of the two.

This was first suggested by the eminent economist, Professor Marshall. It is felt that the workings of the quantity theory of money would bring about an increased commodity price level if increasing quantities of monetary metal as a base could be put into use.

(NOTE)—The objection to this scheme again is that it would be difficult for nations owning various amounts of gold to decide on the relative proportions of gold and silver to be used. Also the fear is expressed that the bars might be melted down by individuals or nations and the most prized metal of the two would be hoarded.

(11) That the silver coins in use throughout the world should contain a greater percentage of silver. Also that silver bars might be used as a base for paper money of small denominations, but of genuine substance, which would be exchangeable for silver only and not for gold. This, it is claimed, would raise the price of silver and so help the buying power of Eastern countries on a silver standard. It is argued, however, by critics that any enhancement of the price of silver would seriously harm producers and debtors in these Eastern countries.

Contract Bridge

By Hamlin B. Hatch, Cavendish Club, Toronto.

The Limitations Of Distributional Valuations In Contract.—As previously stated, quantitative trick taking probabilities of any two combined hands in Contract are determined by three kinds of tricks, i.e. Honor tricks, lone tricks and short suit or ruffing tricks. Valuing the combined twenty-six cards of any particular deal by the valuation table given in a previous article is, as a rule, very accurate up to a total of ten tricks. Beyond ten tricks, it is important that the player realizes that there may be a duplication of values in the hand. By this is meant that high card tricks and ruffing tricks as figured independently in the two hands, may overlap, and that because of this overlapping, the distributional trick taking probabilities of the two hands may add up to anywhere from twelve to fifteen tricks when in the actual play only from ten to eleven tricks will be taken.

(12) That the issuing of all currency and credit shall be nationalized and that all finance and banking shall be operated and managed by Government instead of by private institutions.

(NOTE)—In criticizing this proposal, note is made that no Government of any country so far has ever shown much capacity for successfully managing any large matters of finance or business, and that efforts to distribute credit "at cost" by Governments to the people usually end in high cost and in disastrous losses which have to be borne by the taxpayers.

THE PASSOVER

Golden Text: "Our passover also hath been sacrificed, even Christ."—1 Corinthians 5:7.

Lesson: Exodus 11:1 to 12:36.

Devotional Reading: Psalm 63:1-7.

Explanations and Comments

Instructions As To The Instituting Of The Passover Hillel, verses 1-11.

In the words of the Rabbi Wise, we have now come to "the natal day of the first independent nation constituted upon the principles of liberty and equality." It was fitting that the new era should be dated from that deliverance. The calendar was changed to commemorate it: "The month Abib, known to the Babylonians as Nisan, shall be to you the beginning of months; it shall be the first month of the year to you." Abib corresponded to the end of March and the beginning of April. The month Tishri, the month of harvest, had hitherto been the beginning of the year. "The later Jews have mistaken the date of the year—the ecclesiastical year, which began with the month Abib, for the civil year, which began in the autumn, in the seventh month of the sacred year. In Egypt the year proper to man with the summer equinox, when the Nile commenced to rise."—Elderheim.

Specific directions were given for the Passover feast: "Note the significance of everything about it. (1) The lamb was to be roasted, apparently that it might be kept whole; this represented the unity of the patriarchs. Both were reminders that in no race is the family bond and the racial bond stronger than among the Jews. (2) Bitter herbs were to be used. They were symbols of the sufferings from which God's people were to be delivered. (3) The lamb was to be unblemished, and they were to eat the feast in the garb and attitude of travellers. Both were reminders that their food was not to give them ease, but to make them strong for the journey. They were to stand ready for the signal for departure."—R. C. Gilie.

Recipes For This Week

(By Betty Barclay)

CRUSHED PINEAPPLE CREAM

- 1 cup milk.
- 1 cup cream.
- 1/4 cup crushed pineapple.
- 1 packet gelatin.
- 1 tablespoon cold water.
- 3 tablespoons sugar.

Dissolve junket tablet in cold water. Warm milk, cream and sugar to lukewarm (110 degrees Fahrenheit) NOT HOT—stirring constantly. Add dissolved junket tablet, stir a few seconds and pour at once into individual dessert dishes. Let stand undisturbed until firm—about 10 minutes. Then chill. When ready to serve top with crushed pineapple.

GLAZED CARROTS

These glazed carrots go particularly well with the hot roast lamb and may be cooked in the oven at the same time, thus conserving fuel. Cook six large carrots for fifteen minutes in boiling salted water. Remove the skins. Cut into slices. Place in a baking pan. Make a syrup with one-half cup brown sugar, one-fourth cup butter and one-fourth cup hot water. Pour over the carrots and bake until brown. Baste occasionally.

A machine which makes griddle cakes has ousted fifty girls in Chl's restaurants in New York.

Receipts of government railways in Japan last year were nearly \$11,000,000.

"But, my friend, why on earth do you wear garters on the outside of your trousers?"

"Because I dropped a collar stud down my neck this morning."—Bon-daglesse-Skins. Stockholm.

Subsidy Had Expired

Householders In Ireland Must Bear Expense Of Building

People who recently built houses in Omagh, Ireland, have failed in their efforts to get subsidies from the city council and the government. The subsidies for all the work and materials themselves. At a recent council meeting it was disclosed that many had started the houses under the impression that they would receive aid from both the municipality and the county. It was then revealed that the subsidy had expired March 31, 1931.

"Nature cannot jump from winter to summer without a spring." Nor from summer to winter without a fall.

The latest device for postal facility comes from Germany and consists of a letter-box in which letters are stamped as you post them.

GREAT BRITAIN FAVORS BIG CUT IN ARMAMENTS

London, England.—Great Britain officially defined her attitude towards the United States proposal for a one-third cut in world armaments, generally welcoming the American plan, but producing concrete naval armament limitation proposals in line of the American naval plans which Great Britain does not think go far enough.

In a white paper read before the House of Commons by Stanley Baldwin, acting prime minister, the government pointed out Great Britain's world-wide interests made it impracticable to reduce the number of naval units beyond a certain point.

"But, if there is a limit to numerical reduction, it is still possible, and highly desirable, to secure by other means a large diminution in naval armaments," Mr. Baldwin said.

He therefore proposed important reductions in the maximum size of future capital ships, aircraft carriers, cruisers and destroyers, with corresponding reduction in the maximum gun-calibres for each class.

So far as land armament is concerned, Great Britain has already enforced standards which more than cover the United States limit. The army has been cut from 250,000 in 1913 to 207,000 at present, Mr. Baldwin stated.

And in the air, Great Britain goes step by step with the United States. Great Britain's air force, indeed, is only 20 per cent. of the immediate postwar strength. Great Britain is prepared to support the abolition of the bombing of civilians, and gas and chemical bombing, along with limitations on size and number of aircraft. She would strictly limit the unladen weight of all military and naval aircraft, with the exception of troop carriers and flying boats.

Gas Conservation

National Gas Flares In Turner Valley Have Flashed Out

Calgary, Alberta.—"Hell's half acre," the sobriquet of Turner Valley with its scores of giant natural gas flares painting the sky from 50 miles away a lurid crimson at night, is fading out.

Throughout the entire south end of the valley, not a flicker of light is to be seen. By the middle of the week all the northern flares will also be extinguished and darkness—banned for eight years, finally descended on the field.

The reason? Operators have finally yielded to the pressure for gas conservation and a government board is shutting in the tremendous high-pressure wells. Some of them like the original Royalty No. 4 which "came in" October 14, 1924, have been continuously flowing over the great Hyle well were only recently drilled in.

Lost Trapper Returns

Lindsay Bay, N.W.T.—Andy Nelson, lost seven days in the bush around Great Bear Lake, limped into his camp near exhaustion. Nelson had injured his ankle while making a short prospecting walk among the trees and then became confused in his direction. For seven days, without food, he wandered about and finally managed to take the correct route back to his camp.

Trapper Lost In Arctic

Ottawa, Ont.—James Ascham, lone Fij Islander, who for more than 20 years eked out an existence trapping along the Arctic coast and landed east of Coronation Gulf is listed among the missing, and is thought by the Royal Canadian Mounted Police to have perished on an ice floe north of the mainland of Canada.

Will Exhibit Again

Victoria, B.C.—British Columbia honey producers, whose exhibit at the 1921 Imperial fruit show in England won six out of nine prizes awarded for honey, are to invade the show again this year.

Heavy Rail Shipments

Churchill, Man.—The number of rail shipments over the Canadian National lines is increasing. There were 200 shipments of less-than-carloads lots last week. Much of the material is going to northern outposts.

Gas Price Advance

Vancouver, B.C.—Wholesalers here and in Victoria announced an increase of two cents a gallon in the price of gasoline to retailers, making the wholesale price 20 cents a gallon.

W. N. U. 1950

Cocos Island Treasure Not Yet Uncovered

Head Of Expedition Says Report Of Success Unfounded

Panama City.—Col. J. E. Leckie, head of the Vancouver, B.C., expedition which is searching for buried treasure on Cocos Isle, off the coast of Costa Rica, wired the United States naval reserve station at Balboa that reports the treasure had been uncovered were unfounded.

In a wireless conversation with the naval reserve station operator the operator of the expedition added: "How d'd anybody ever get the notion we would ever find anything on this God-forsaken island?"

The Balboa reserve station is the expedition's means of contact with the rest of the world and officials there said no message indicating the treasure had been found were transmitted lately.

J. Walter Young, engineer of the reserve station at Balboa, said Leckie declared before he left Panama for Cocos Island: "If we find gold you'll never know it until after it is safely aboard the Canadian destroyers which are standing by within a few miles to take the treasure to Canada."

Ottawa, Ont.—"We hope the destroyers are there, for we need the money," was the comment of defence department officials. "However," added the officials, "we are rather afraid the destroyers are still to be found in the neighborhood of Esquimaut, their home station."

Wheat At Churchill

Over 1,600,000 Bushels Of Wheat In Bins At Northern Port

Churchill, Man.—More than 1,600,000 bushels of the first order of 2,000,000 bushels of wheat to be shipped through this new port this summer, are now in the bins in the harbor, and the second order is rolling in from Saskatchewan points. It is expected 11 ships will be necessary to take away the first two orders of grain. There is much speculation here as to when they will arrive, but none as to how fast they can be loaded. Two or three days will do the job, if there are enough trained cargo trimmers on hand.

Four ocean steamers will be able to line up in a row, when the extension of the grain galleries is completed. They can be loaded in a day. The elevator was designed for a total capacity of 10,000,000 bushels. The first storage unit of 2,500,000 has been completed, and is being filled for the first time. Grain men state it will soon be necessary to increase the storage capacity since the investment in plant equipment and machinery has been made for a much larger storage plant.

'Plane Crash In North

Bodies Of Three Aviators Will Be Brought To Fort Smith

Edmonton, Alberta.—Bodies of Andy Cruikshank and his air mechanic, who died with him in a plane crash near Lake Mazened, in the Northwest Territories, are likely to be brought to civilization for burial, it was learned here.

Pilot Walter Gilbert who found the broken bodies of Cruikshank, one of the north's greatest airmen, and Horace Torrie and Harry King, mechanics, has made a second flight, to the lonely spot where the wrecked plane lies with the intention of taking the bodies to Fort Smith.

Mrs. Cruikshank and Mrs. King are at Fort McMurray, radio station and trading post in northern Alberta, and it is considered possible the remains of their husbands may be taken there.

G.N. Shops Using Wood

Port Arthur, Ont.—Wood instead of coal is being burned in northwestern Ontario roundhouses and shops of the Canadian National Railway with favorable results on the labor situation in the district. Hon. William Finlayson, Ontario Minister of Lands and forests, said here. The railway, he said, agreed to use the wood in substitution for coal formerly imported from the United States.

World-Wide Depression

Vancouver, B.C.—That abolition of world-wide depression depends not on any one nation, but on world co-operation, was indicated by speakers at sessions of the convention of Pacific Advertising clubs in annual meeting here.

Bridge Banned

Calgary, Alta.—Calgary's "bridge band" has been banned from a home and robbed two women a gun-point of \$9.75. The bandit has terrorized bridge parties for the last month, holding up the players and obtaining all ready cash.

Trans-Continental Flight

Vancouver Sun 'Plane Lands Safely At Coast Airport

Vancouver, B.C.—Landing their plane, "The Vancouver Sun," at the Sea Island airport here, pilots R. H. Storer and B. R. Ronald completed their trans-Canada flight which started from Montreal.

Originally planned as a trans-Canada nonstop refueling flight, the flyers were forced to break up their flight when a broken oil line forced their ship down near Sudbury and delayed them three hours shortly after their takeoff from St. Hubert aerodrome, Montreal.

Practically the entire flight was made bucking strong head winds and rains which lashed the ship.

REPORTS OF GUN RUNNING ON IRISH COAST

Dublin, Ireland.—President Eamon de Valera was bombarded with questions in the Dail Eireann over alleged attempts to land arms illegally on the coast of the Irish Free State. The president declared the government had taken all precautions that the representations warranted.

The discussion ended with Patrick McGilligan, former minister for external affairs, declaring he was unsatisfied and would again raise the matter.

In reply to questions, Mr. de Valera declined to say whether the Free State had sought the collaboration of other governments or had received any offer of collaboration of other governments or had received any offer of collaboration from "another government" to deal with the gun-running.

A member asked if the president was aware that a boat had been searched for arms two weeks ago. Mr. de Valera said the step had been taken in accordance with "general precautions" he declined to say whether boats had been searched at the authorities' request.

Unofficial reports some time ago said that vessels of the royal navy were on the look out for vessels reported to be attempting to land arms, probably for the illegal Irish Republican army.

Dairy Probe

Alberta Government Announces Members Of Fact-Finding Committee

Edmonton, Alberta.—Alberta Government announced the members of the fact-finding committee which will study the milk question in the province. Formation of the committee is the result of complaints made by milk producers and distributors over the low price received for their product.

J. J. Frawley, solicitor of the attorney-general's department, is chairman of the committee which will concentrate mostly on the situation in Calgary and Edmonton. Every phase of the question from producer to consumer will be investigated by the committee which will commence its work on June 1.

Foot and Mouth Disease

Victoria, B.C.—Foot and mouth disease in cattle, prevalent in certain areas in the British Isles, has been definitely traced to the importation of foreign broccoli through scientific investigations conducted by Scottish agricultural organizations, says T. G. Coventry, British Columbia market representative in England, in a letter to J. B. Munro, deputy minister of agriculture here.

Wolves Of Alberta

Sault Ste. Marie, Ont.—Wolves of Alberta will strut before visitors during Wolf week, July 25 to 30, without fail. This was the assurance which was given Wednesday, July 6, by the committee in charge, when it was reported nine wolves were available already. Others are being sought. The wild life show will include moose, bear, deer, beaver, mink, and other animals seen in this territory.

CANADIAN MEDICAL MEN COMPLETE CANCER REPORT

New knowledge of the cause and cure of cancer is about to be revealed to the Cancer Institute of London, England, by Dr. P. J. H. Campbell (left), who with Dr. R. E. P. Jones (right), has been working for five years on cancer research for the University of Western Ontario. Dr. Campbell has sailed for England to present the unpublished report which is said to contain many startling discoveries.

COMES TO CANADA

Sir Douglas Newton, famous British agricultural expert, who will come to Canada with the British Imperial Conference delegation to advise on matters pertaining to agriculture.

Obtains Her Freedom

Divorce Has Been Granted To Ethel Catherwood McLaren

Reno, Nev.—Ethel Catherwood McLaren, known throughout Canada as the "Saskatoon Lily," and rated the most beautiful athlete in the 1928 Olympic games, was divorced on grounds of non-support here from James Gillan McLaren of Toronto.

The divorce action was filed last October, but Mrs. McLaren declined to proceed at that time for fear that her residence in Nevada would jeopardize her chances to represent Canada in the coming Olympic games. She refused to discuss her Olympic games plans, but said, however, that she is in training.

The "Saskatoon Lily" and McLaren were secretly married in York township, Ontario, November 25, 1929.

Free State Delegates

Twenty-Five Representatives To Attend Economic Conference

Dublin, Ireland.—It was officially announced that the Irish Free State delegations to the Imperial Economic Conference will consist of 25 persons and will be headed by three government ministers. Sean T. O'Kelly, vice-president of the executive council; Sean Lemass, minister of industry and commerce, and Dr. Ryan, minister of agriculture.

Senator Johnson, one of the Free State's labor leaders, will accompany the party as an expert adviser of labor problems.

Will Support Party

Alfred Smith Decides To Back Presidential Nominees

New York.—Alfred E. Smith said he would support the nominees of the U.S. Democratic Party, after expressing an opinion that the formation of a third party would not be practical "at this time."

Smith amplified a prepared statement in the affirmative just once to say that his declaration of support for the Democratic party included support for its presidential and vice-presidential nominees, Roosevelt and Garner, neither of whom was mentioned by name in the statement.

A New Racket

American License Plates Cause Quebec Officials' Much Worry

Quebec, Que.—The range of human ingenuity in the "racket" business seems to be unlimited.

The latest twist of humanity's pre-occupation to make or save money is revealed in a statement by Quebec highway officials. They say 1931 license plates of several American states have been imported in quantities, and sold to Canadians who have thus saved license renewal fees.

The beautiful part of it all—for the offenders—is in the officials' confessed inability to deal with the offense severely, because of the great number of "real" American citizens at present touring the province.

Stay Was Limited

Churchill, Man.—Tired, wet, cold and bedraggled, the first man to get as far as Churchill in a gate-crashing attempt, arrived here aboard a waiting special. The grain train was carrying one car of lumber. The man crouched between the jutting ends of the timbers. He suffered intense cold. He was sent south on the first train.

CHURCHILL WILL GOVERN FREIGHT RATES ON GRAIN

Churchill, Man.—Churchill will eventually govern freight rates on export grain from the west, according to northern shipping men.

Shipping men believe that the strategic position of the port will have a wide influence over all other North American terminals. They base their forecast on the fact that Churchill is not only more accessible to the overseas ports, but that the saving in time of shipments en route, and consequent saving in interest on money tied up in cargoes, will bring great volumes of business here.

For instance, it is stated that while 16 days were occupied in taking the test shipments of last year across the ocean, the ships can make the voyage easily in 12 days, if necessary.

It is pointed out that the Dalziel steamers are high grade vessels, capable of 12 knots an hour. Wheat could be started from prairie points and delivered in the European ports in three weeks.

This gives Churchill a decided advantage over Vancouver, where grain is delivered to ships, which must of necessity take as many as six weeks to deliver grain over the longer route.

Speaking of reports from Ottawa to the effect that special companies, costing \$5,000, would have to be installed in ships entering this port, harbor men here declare that the modern ships already are equipped with necessary instruments. They point out that no pilots are necessary to bring ships in here. There is deep water all the way. Ships have radio protection and steam into Churchill in safety to find a deep water pier and safe anchorage.

Who gets the benefit of the saving in freight rates by shipping wheat via Churchill?

This was the question asked by the Prince Albert board of trade. It was shown that the rate from Prince Albert to Churchill was 25 cents per hundred pounds, as against 23 cents per 100 pounds from Prince Albert to Fort William.

It is said here that in the case of the sale by the pool to the Continental Grain Company, the pool farmer receives the benefit, since the grain is sold on delivery here. The farmer is said to receive the market price at the country elevator, through the pool, which in turn ships it to Churchill, where it is bought "in storage" by the grain company.

It is pointed out that the grain company has nothing to do with that saving since they bid on wheat "in Churchill." It does not matter to them how it gets here, or what it costs.

The railways do not get the saving. In fact they do not receive as much revenue as they would if Churchill port were not open, and they got the longer haul to the lake head.

On the other hand the Saskatchewan pool, with five terminals at Fort William, where handling charges are collected, profits by no handling charges the government elevator in Churchill. In order to encourage shipments, the government took off the handling charges on all shipments until after the end of August this year. The charges are approximately one and one-half cents per bushel.

There is a saving on freight rates of one to three cents on the Churchill route, according to the locations of the northern prairie towns shipping export wheat.

FRENCH SUB IS LOST DURING MANOEUVRES

Cherbourg, France.—The French submarine "Prometheus" plunged without warning under the waves of Cherbourg harbor while on a trial manoeuvre, taking down at least 66 men in 150 feet of water seven miles north of Cape Levi.

Seven members of the crew, including Lieutenant Du Mesnil, the ship's commander, were saved when they were hauled from the deck into the sea by the lurch of the vessel in its unexpected dive. They swam until they were picked up by a fishing boat.

Efforts to locate and salvage the submarine with its imprisoned occupants, begun immediately, were impeded by strong currents prevailing at that spot. Search for the sunken craft by naval planes was handicapped by miserable flying conditions, which made their job dangerous.

The submarine, in service only two years, was endeavouring to correct mechanical faults when it set out particularly for diving trials.

The ministry of marine at Paris said the "Prometheus" had not been in perfect working order. Various adjustments had been found necessary before it could be deemed fit for a long voyage. It was in an effort to bring the machinery to perfection that the disastrous trials had been arranged.

It was estimated 49 members of the crew and 17 other men, including engineers and workmen, went down with the ship. The correspondent of the Paris newspaper "Le Matin" estimated the victims at 70.

Sensational Trial Ended

Mrs. Elvira Barney Acquitted Of Charge Of Murder

London, England.—A jury of 10 men and two women found that Mrs. Elvira Barney, 26-year-old daughter of a wealthy baronet, was not guilty of the murder of Thomas William Scott, Stephen's brother, who was shot to death in her flat after a party, May 31.

The verdict was reached after one hour and 53 minutes of deliberation. Mrs. Barney collapsed when she heard it. A short time later, when freed, she left the Old Bailey and went to the home of her father and mother, Sir John and Lady Mullens.

The jury also acquitted Mrs. Barney on two other charges—one of manslaughter and another of intent to do Stephen, the son of a banker, grievous bodily harm by trying to shoot him during a quarrel a few weeks before his death.

Giant Stand Of Wheat

Ontario Farmer Has Grain Over Five Feet High

London, Ont.—Frank Spettigue, of Westminister township, proudly surveys his broad wheat fields after reading that the grain stands of the west, which promise to produce a better-than-average yield, are about three feet tall. And the reason for Farmer Spettigue's pride hangs on the fact that his wheat right now averages five feet, four inches in height. The giant stand is believed to set a record for the district at this date.

Library Grants

London, Eng.—Announcement of Carnegie Foundation grants to Canadian university and college libraries will be made in October and November, said Professor Fred London, librarian of the University of Western Ontario. He is a member of the Canadian committee of the foundation.

Belgium's New Tax

Brussels, Belgium.—A transfer tax and luxury tax on products made in or exported direct from Canada and France will be imposed on August 1 by a royal decree here. The tax will cease to have effect with the conclusion of conventions to avoid duplication in regard to the transfer.

Visits London

London, England.—One of the most striking figures of the war has arrived in London for a private visit—William Hughes, prime minister of Australia from 1915 to 1923, whose ready wit and extraordinary acuteness caused him to be called the Australian Lloyd George.

Egypt Is Increasing Its Import

India expects its present cotton crop to total 4,600,000 bales.

Insect Pests Cause Damage

Seed Maggot Destroying Crops in Parts of Saskatchewan

While the webworm armies are cleaning up on gardens and weed patches in all parts of Saskatchewan, reports of another pest which has not been so prevalent in other years and has destroyed seed grain in many hundreds of acres, are being received.

A report that the United States corn borer had been found responsible for losses at Semans was found incorrect. The responsible pest, which has done damage in other sections and within six miles of Saskatoon, is the seed maggot, which destroys the grain before it has a chance to germinate, particularly affecting late sown oats and barley.

Kenneth M. King, in charge of the Dominion Entomological laboratory in Saskatoon, identified the Semans pest, which there had cleaned up 95 per cent. of the crop in a large field as the seed maggot, known as the seed corn maggot in the United States. There farms have been infested and about 100 acres of crop nipped in the germinating state.

According to Mr. King infested fields are located at Wilkie, Woodrow, Pilot Butte, Colonsay, Balgonie and Cadillac, and a field six miles east of Saskatoon.

The flies, which are the other life stage of this maggot, belong to a native species that is always fairly abundant, but this is the first time in Saskatchewan that the maggot has been observed causing any serious damage to field crops. Mr. King suggests that rather unusual climatic conditions such as heavy moisture after a long, dry period might have particularly favored the development of the maggots. In the field examined at Semans, where the heavy damage was done, he found as many as seven maggots to a single kernel of barley.

The webworm, a branch of the army worm family, resulted from the moth that was extremely prevalent this spring. At Semans one farmer's wife went out for beet greens and found them so completely eaten that one would not have guessed they ever grew in her garden.

Japanese Love Flowers

Chrysanthemum In Queen and Cherry Blossom King Of All

The Japanese, who are traditionally a flower-loving people, claim that their islands produce 3,200 species of flowers. The white plum blossom tells of the coming of spring; then follow the cherry, wistaria, azalea, iris, peony, lotus, chrysanthemum and the camellia. The cherry is the monarch of all and it is celebrated by feasts and processions. The chrysanthemum is queen, and is on the crest of the Emperor. It has been cultivated for 2,500 years. The Japanese often enrich the roots of wistaria with rice wine. Their peonies are sometimes nine inches across, and the 50 varieties, when cared for after cutting, will last three weeks.

Blind Astronomer Retires

The blind astronomer of Yerkes Observatory, Lake Geneva, Wisconsin—Dr. Edwin Frost—famous for his knowledge of astrophysics, retired July 1. Dr. Frost has been director of Yerkes Observatory since 1905. Although totally blind for several years, he continued his astronomical work almost without interruption.

Family Serve In Commons

With the retirement of J. G. Hart, superintendent of the members' cloakrooms in the English House of Commons, recently, he completed nearly 39 years' service there. His grandfather, grandmother, mother and aunt also served in various positions in Commons.

It's pretty hard to tell what does bring happiness. Poverty and wealth have both failed.

"Romantic will never do anything big. Heredity is against him."
"Do you know his family?"
"Yes. They are merely honest people."—Journal Amusant, Paris.

W. N. O. 1934

Queen Alexandra

Unveiling Of A Beautiful Memorial To The Well-Loved Queen

There was something peculiarly artistic and touching about the unveiling recently, on the grounds of Marlborough House, London, of a beautiful memorial to the well-loved Queen Alexandra. The sculptor, aged and infirm, who had thrown his whole soul into the work, was received by the King and Queen, by whom he was congratulated on the excellence of his production. Albert Gilbert, who designed and executed the memorial, which consists of figures depicting Faith, Hope and Charity, began the work four years ago. Evidently a temperamental artist, he is reported to have destroyed several of his early designs rather than expose them to public criticism. This was to be the triumph of his career, and he struggled on against illness and disappointment with results achieved. At last he was satisfied, and London is enriched by another splendid example of the sculptor's art.

The occasion recalls the gracious and charming Queen whose memory the sculptured group perpetuates. Alexandra was beloved by the British people. As Princess of Wales, and following the death of the Prince Consort, she relieved Queen Victoria of most of the social duties involving upon the sorrowing ruler, and in this way became a familiar and extremely popular figure in the life of the nation. As wife of King Edward VII., she endeared herself to the British people, and the years of her widowhood saw her honored by a sympathetic and admiring people.

When Alexandra, a Danish Princess—'Sax King's daughter from over the sea'—journeyed to England to become the bride of the Prince of Wales she was greeted with a great outburst of public enthusiasm, well voiced in 'Tennyson's lines: "Saxon and Norman and Dane are we, but all of us Danes in our welcome to thee, Alexandra." The unveiling of the memorial fell on the 21st anniversary of the establishment of Alexandra Rose Day, on which so much good work is done for philanthropic undertakings, which give additional meaning to the poet's further words of greeting: "Welcome here, all things youthful and sweet; scatter the blossoms under her feet. Break, happy land, into earlier flowers; make music, O bird, in the new-budded bowers!"—Toronto Globe.

More Employed At Seventy Than Nineteen

Small Per Cent. Of Septuagenarians In Canada Not Working

More men of 70 are at work in Canada than youths of 19. The septuagenarians today is occupying the job that a generation ago his grandson would have secured. The young Canadian does not really become a man until he is 28 years of age. At least half have to wait until that time before they are in men's jobs.

These are figures gleaned from the last census and just announced by the Dominion Bureau of Statistics. Censuses show that of those who have reached the 70 mark only 41 per cent. were unemployed or on pensioning. Of those who had reached the age of 19 there were 44 per cent. who had not found jobs.

The maximum proportion at any age in men's jobs is during the 40's, whence it steadily recedes until the 60's, when only half remain, just as only half had arrived at 28.

Records of the bureau show that the years spent in school by Canadian youth are lengthening.

Not The Same Gub

An Englishman had invited an American friend to visit his shooting box in the Highlands. On the first day they did not have much sport, as the birds were shy, but that did not worry the host, who admired the glorious scenery.

As they stood at the top of a fine mountain, from which they obtained a magnificent view of frowning crags and placid lochs, the sporting host said ecstatically: "Isn't this magnificent? Why, just to stand here makes a man feel like a little gub."

"It does," agreed his guest. "I tell you I've had nothing but a ham sandwich since ten o'clock."

The Acid Test

Salesman—Ladies and gentlemen I have here the famous flexible comb that will stand any kind of treatment. You can bend it double—you can twist it—you can—

Interested Listener—Say, Mister, can you comb your hair with it?

The rudder of the S.S. Beringaria weighs 55 tons.

THEIR LIFE A BOWL OF ROSES

Mrs. Helen Wills Moody (left) and Miss Sarah Paley, members of the United States women's Wightman Cup team, are shown with the famous trophy which they won from John Bull's representatives by the narrow margin of four matches to three. An admirer has filled the trophy with roses in a pretty tribute to the racketeers.

How Advertising Pays

New York Merchants Proved Success Depended On It

Back in 1923 there was a general strike in the newspaper trades in New York, embracing every important metropolitan daily printed in English as well as the German and Italian papers. For nearly two weeks only a daily bulletin was issued. This carried no advertising, as there was no room for any. During this period, when advertising was suspended, the merchants of New York sustained losses running into millions and millions. For the first time it was definitely proved that their success was largely dependent upon advertising—that is, if they wanted to do business on a large scale.

During the present depression the companies, which have maintained constant and well directed advertising campaigns have been much more successful than those who started their retrenchment program by cutting down on the advertising.

Of course even the best advertising and the biggest appropriations cannot maintain the sales of an inferior product, but if the merchandise represents good value, advertising is a vital factor in keeping it moving.

A Fast Growing Town

Meadow Lake, Saskatchewan, Wants More Room For New Commers

Which is the fastest growing town in Saskatchewan? The answer, according to S. Young, provincial director of town planning is Meadow Lake.

Meadow Lake, a town boasting some 500 inhabitants, north of North Battleford, was organized as a village on August 24, 1931. The railway only reached Meadow Lake in 1930. The townsite at present includes two quarter sections of land.

Now the townfolk are talking about opening up a new sub-division in order to make more room for newcomers.

"Which of those two men is the bridegroom?"

"The anxious looking one; the smiling one is the bride's father."

Home Address London

United States Paper Has Admirable For John Bull

He is a pompous, choleric old chap at times, and one can find a lot of things to point an accusing finger at his backyard, but he has his points. He is not white, and he has never "welched," and without preaching it very much, he has practiced the philosophy of the copybook maxim that honesty is the best policy. The old boy pays. The going has been pretty rough lately, still, when he wanted to borrow dollars last summer, our bankers were glad to accommodate him. They know their man. Things are a bit easier with him now, and he says he do? Characteristically, he has paid \$150,000,000 of that loan. His name is John Bull, home address, London, England, familiar figure in all the capitals and most of the crossroads of the world, involved in pretty much all the crises of history and somehow or other, contriving to muddle through—St. Louis Post-Dispatch.

Letters To The Editor

Are Usually Printed Unless Of A Libelous Nature

There are some people who think that an editor publishes only those letters which agree with editorial opinion of his paper. That is not true.

There is only one thing that suppresses letters in newspapers, and that is the Libel Law. Unless opinions are slanderous, or statements clearly contrary to the actual facts, all letters are published.

The Radio Issue

The fundamental importance of the radio issue which has been fought out and won for the public at Ottawa has not been adequately understood. It is not a question of whether the greatest single agency for influencing public opinion should be owned and operated by and for commercial interests or by agencies responsible to and controlled by the public. Farmer's Sun.

A sing-song is a kind of African antelope.

An Old Trick

Old Novelty Of Walking On The Ceiling Has Been Revived

The first man ever to walk on a ceiling was young Dan Costello, of Racine, son of the famous circus man. This youngster invented ceiling walking and for one season was the premier attraction of the Cooper & Bailey Show. After that every circus had a ceiling walker and the novelty soon wore off, for everyone knew what a simple thing it was and how easily it was done.

This act recently was revived by a movie actor in Hollywood, Cal., and it is thought to be something new, which causes many an old man to smile, especially those who remember how the act was secretly developed in a Racine barn. Popcorn George, the Mayberrys, Burr Robbins and the Ringlings were the act out in a single season. And they were all Wisconsin circus men.—Milwaukee Journal.

Where the Dollar Goes

Sixty Per Cent. Of Income Spent On Food and Clothing

Every dollar the average man spends goes in part to the seller of foodstuffs, clothing and so forth, while another part goes to intangibles or services. The Investors' Syndicate states that 90 per cent. of incomes is spent on the former. Ten years ago people spent a larger proportion of each dollar for goods, the total being in the neighborhood of 96 cents. More and more, however, they have come to use such valuable, intangible, services as health, educational and recreational facilities. After all, investors' syndicate points out, it is possible for an individual to eat just so much food, and to wear out a car just so much limited amount of shoe leather. The growth of demand for such articles must be limited to the growth of the population. The human wants for amusement and other intangible but nevertheless real values are relatively unlimited.

Receives Book Of Signatures

Ambassador Gibson Honored For Attempt To Save Edith Cavell

Ambassador Hugh S. Gibson received in commemoration of his efforts to save Edith Cavell, the English nurse, from execution during the World War, a book presented on behalf of the women of England.

Bound in blue morocco, it contains the signatures of several thousand women, including such prominent ones as Ellen Terry, the actress.

It was explained that the women had planned to give the volume to him several years ago, but it had been delayed by various causes.

Trans-Canada Highway

Propose To Link Kenora With Port Arthur As The Next Step

Discussing the government road policy, the minister said the next step in highway construction in western Ontario would be to link Kenora and Port Arthur. Completion of a highway from Winnipeg to Kenora was marked with appropriate ceremonies.

A road from Kenora to Port Arthur, Mr. Finlayson said, would provide a highway loop joining the lakehead with Winnipeg via Kenora and via the United States. A highway, at present leads from here to Duluth, Minn.

That Was Different

"Mr. Nobbs," commenced the rather timid-looking young man—"er—ah—that is, can—er—I—will you?"

"Why, yes, my boy, you may have her," smiled the girl's father.

The young man gaped.

"What's this? Have whom?" he asked.

"My daughter, of course," replied Nobbs. "That's what you mean. You want to marry her, don't you?"

"Why, no, sir," said the young man. "I just wanted to know if you could lend me ten pounds."

"Certainly not, sir," said Nobbs sharply. "Why, I hardly know you."

Keeping In Step

A London, Ont. doctor is off to London, England, to tell the Cancer Institute of progress made in the Western University toward solving the mystery of that dread malady. Thus is the New World keeping step with scientific research in the Old.

Fifty-Fifty

A mail order house recently received one of its advertisements planned to a note reading, "Send article—if good, will send check."

They replied with, "Send check—if good, will send article."

Soviet Russia led all other countries in the purchase of American industrial machinery last year.

Sailings For Hudson Bay

Insurance Rates Now Placed On An Equitable Basis

Churchill, prairie Canada's ocean gateway to the markets of Europe, will be a world-recognized port "in a very few years," in the opinion of W. H. Harding, Montreal shipping agent.

Already, he said in an interview, insurance rates for the Hudson Bay navigation season are on an equitable basis and will grow progressively lower as the volume of business increases.

Insurance underwriters are quoting lower rates this year than last, when two trial grain shipments were successfully made from Churchill.

More than 1,000,000 bushels of Saskatchewan grain are stored in the year-old government elevator on Hudson Bay and within a few days this figure will be swelled to the elevator's 2,000,000 bushel capacity. Mr. Harding is confident that about 4,000,000 bushels will be shipped via the northern route this summer.

Definite sailing of the first ship to enter Churchill with commercial cargo was announced by the Montreal agent. The "Fennyworth" is to leave Newcastle-on-Tyne, July 15, making stops at Antwerp and Liverpool before crossing the Atlantic and entering Hudson Straits. It will deliver a mixed cargo at Churchill early in August.

But the "Fennyworth" would be only one of a fleet of ships to visit Churchill during August and September if arrangements are completed for shipping 4,000,000 bushels of western grain to Europe via the northern route. At least 16 ships would be used to carry this amount.

"Churchill" is going to open just what Vancouver experienced some years ago," Mr. Harding said. "Vancouver had precisely the same difficulties in getting ships to use its facilities. Today Vancouver is an accepted fact in the trade."

Grain from the greater part of Saskatchewan and northern Alberta can now be shipped to Liverpool at lower cost via Churchill than by the rail, lake and then ocean route from Montreal, Mr. Harding said.

Tagging the Birds

Bird-Banding Contributes Much Valuable Scientific Information

Bird-banding has afforded much new and valuable scientific information concerning Canada's native wild birds and any person who finds a banded bird is requested to help in the advancement of this work by reporting the details to the commissioner, national parks of Canada, Department of the Interior, Ottawa. An interesting tract brought out by a recently reported banding operation is recounted here.

Official band 182287 was placed on a purple finch by Mrs. Frank Hubbard at New Haven, Connecticut, on March 23, 1928. The finch was next found, with a broken wing, by Miss Blanche Spurr at Deep Brook, Nova Scotia, on July 4, 1931. Miss Spurr took the bird home and placed it in a large screened porch, where, with care, the finch recovered its power of flight sufficiently to be released on August 16, 1931. As the finch was still wearing the band when it was liberated, it is possible that it may be again reported.

Speaking Of Operations

Speaking of operations—Dr. L. B. Clausen, of St. Paul, veterinarian studying what certain foods do to cows, plans to install a small glass window in the side of one so he can see exactly what goes on inside. "It won't hurt the cow," he said, "and she should get along as well with the window in her side as she does now."

"Porter, can't you stop that noise in the corridor? I can't sleep."

"Very soon now, sir. The brigade have the fire under control."

"I am in a desperate fix, and I don't know whom I am to ask to lend me the money."

"You reassure me. I thought you were going to ask me."—Moustique, Chatterbox.

FANCIFUL FABLES

"DON'T BE ROBBED OF YOUTH!"

SAYS RALPH GRAVES

RALPH GRAVES
Screenplay Writer

"Here in Hollywood, the stars will advise you. 'Use gentle, soothing Lux Toilet Soap regularly as we do.'"

"The screen and stage stars usually keep that lovely iridescent glow that youngsters have. And lots of other women, these days, seem to have learned their complexion secret!"

"Above all, guard complexion beauty. The stars will advise you. 'Use gentle, soothing Lux Toilet Soap regularly as we do.'"

"Actresses the world over use fragrant, delicately white Lux Toilet Soap to keep their complexions always exquisite. In Hollywood, where 688 of the 694 important actresses are devoted to it, this fine soap is offered in all the great film studios."

You are sure to love the way it cares for your skin! The caress of dollar-a-caree French soap for just 10c!

"The Splendid Fiddler" and "The Harp of Far Land."
Hodder & Stoughton, Ltd., London.

CHAPTER XXV.

Arranged by Telephone
The visit to London, if it had not been profligate in the results which Lady Anne had hoped for, had at least accomplished certain things. It had acted as a brake upon the swiftness turning wheels of two lives precariously poised at the top of that steep hill of which no traveller can see the end, but which very surely leads to heartbreak and disaster, and had sufficed, as Jean had suggested that it might, to restore Nick to a more normal and temperate state of mind.

He and Claire had passed a long hour alone together the day after he returned to London, and now that the first violent reaction, the first instinctive impulse of unbearable revolt from Sir Adrian's spying and brutality had spent itself, they had agreed to shoulder once more the burden Fate had laid upon them, to fight on again, just holding fast to the simple knowledge of their love for one another and leaving the ultimate issue to that great unfathomable Player who "hitters and thunders, moves, and mates, and slays," not with the shadowed vision of our finite eyes but with the insight of eternity.

Jean had seen them coming hand in hand through the cool green glades of the wood where the great decision had been taken, and something in the two young, stern-set faces brought a sudden lump into her throat. She turned swiftly aside, avoiding a meeting, feeling as though here was holy ground upon which not even so close a friend as she could tread without violation.

To Jean herself the week in London had brought a certain new tranquillity of spirit. Quite naturally and without effort—thanks to Lady Anne's brilliant stage-management—she and Blaise had been constantly in each other's company, and, with the word "Beloved" murmuring in her heart like some tender undertone of melody, the hours they had shared together were no longer a mingled ecstasy and pain, marred by torturing doubts and fears,

Add a small amount of cream, or sweet oil, to Minard's Liniment. A simple treatment daily. A simple treatment daily. A simple treatment daily.

Clear up your skin!

MINARD'S
"KING OF PAIN"
LINIMENT

W. N. U. 1860

but held once more the old magic of that wonder-day at Moor was dead. Somehow the dividing line did not seem to matter very much, now that she was sure that Blaise, on his side of it, was loving her just as she, on hers, loved him. Indeed, at this stage Jean made no very great demands on life. After the agony of uncertainty of the last few months, the calm surety that Blaise loved her seemed happiness enough.

Other sharp edges of existence, too, had smoothed themselves down—as sharp edges have a knack of doing if you wait long enough. Burke seemed to have accepted her last answer as final, and now spared her the effort of contending further with his tempestuous love-making, so that she felt able to continue her friendship with Judith, and her consequent visits to Willow Ferry, with all its "genie" as though the episode at the "Honey-mooners' Inn" had never taken place. She even began to believe that Burke was genuinely slightly remorseful for his behaviour on that particular occasion.

Apparently he had not made a confidant of his sister over the matter, for it was without the least indication of a back thought of any kind that she approached Jean on the subject of spending a few days with her and Geoffrey at their bungalow on the Moor.

"Godd and I are going for a week's blow on Durinmoor, just by way of a 'pick-me-up.' Come with us, Jean! It will do you good after study old London—blow the cobwebs away!"

But here, at least, Jean felt that discretion was the better part of valour. It was true that Burke appeared to have accepted her last answer as final, but in the informal companionship of daily life in a moorland bungalow it was more than probable that he would become less manageable. And she had no desire for a repetition of that scene in the inn parlour.

Therefore, although the Moor, with its great stretches of gold and purple, its fragrant, heathery breath and its enfolding silences, appealed to her in a way in which nothing else on earth seemed quite to appeal, pulling at her heartstrings almost as the nostalgia for home and country pulls at the heartstrings of a wanderer, she returned a regretful negative to Judith's invitation. So Burke and Mrs. Craig packed up and departed to Three Fir Bungalow without her, and life at Staple resumed the even tenor of its way.

The weather was glorious, the long, hot summer days melting into balmy nights when the hills and dales and the old house was set were bathed in moonlight mystery—transmuted into a wonderland of phantasy, cavernous with shadow where undreamed-of dragons lurked, lambent with opalescent fields of splendour whence uprose the glimmer of half-visible palaces or the battlemented walls of some ethereal fairy castle.

More than once Jean's thoughts turned wistfully towards the Moor which she had so longed to see by moonlight—Judith's "holly of holies" when the hills and dales and the old house was set were bathed in moonlight mystery—transmuted into a wonderland of phantasy, cavernous with shadow where undreamed-of dragons lurked, lambent with opalescent fields of splendour whence uprose the glimmer of half-visible palaces or the battlemented walls of some ethereal fairy castle.

She felt almost tempted to write to Judith and propose that she should join her at the bungalow for a few days after all if she still had no objection. And then, as is often the way of things just when we are contemplating taking the management of affairs into our own hands, the second chance offered itself without any directing on Jean's part.

The telephone bell rang, and Jean, who was expecting an answer to an important message she had phoned through on Lady Anne's behalf, hastened to answer it. Very much to her surprise she found that it was Burke who was speaking at the other end of the wire.

"Is that you, Geoffrey?" she exclaimed in astonishment. "I didn't know your bungalow was on the telephone. I thought you were miles away from anywhere!"

"I isn't. And we are," came back Burke's voice. From a certain quality in it she knew that he was smiling. "I'm in Okhampton, phoning from a pal's house. I've a message for you from Judy."

"Ye-es?" intended Jean enquiringly.

"She wants you to come up to-morrow, just for one night! It'll be a full moon and she says you have a hankering to see the Moor by moonlight. Have you?"

"Yes, oh yes!"—with enthusiasm.

"Thought so. It certainly does look topping. Quite worth seeing. Well, look here, Judy's got a party of friends, down from town, who are coming over to us from the South

Devils ride—going to drive up and stay the night, and the idea is to do a moonlight scramble up on to the top of one of the towers after supper. Are you game?"

"Oh! How heavenly!" This, ecstatically, from Jean.

"How what?"

"Heavenly, Heavenly!"—with increasing emphasis. "Can't you hear?"

"Oh, heavenly—yes, I hear. Yes, I would be rather—if you came."

Even through the phone Burke's voice conveyed something of that upsettingly true ardour of his.

"I won't come unless you promise to behave," said Jean warningly. Bubbling over with pleasure at the prospect unfolded by the invitation, she found it a little difficult to infuse a befitting sternness into her tones.

"Do I need to take fresh vows?" came back Burke's answer, spoken rather gravely. "I made you a promise that day—when we drove back from Durinmoor. I'll keep that."

"I'll never kiss you again till you give me your lips yourself."

The words of the promise rushed vividly into Jean's mind, and now that steady voice through the phone uttering its quiet endorsement of the assurance given, made her feel suddenly ashamed of her suspicions.

"Very well, I'll see them," she said hastily. "How shall I get to you?"

"If all planned, because we thought—at least we hoped—you'd come. If you'll come down to Okhampton by the car and drive you up to the bungalow. Judy is going to drive into Newton Abbot early in the morning, and afterwards she'll lunch with her London people—the Holbourns. Then they'll all come up together in the afternoon."

(To Be Continued.)

Province of a Newspaper

Is To Report Actual Happenings Without Any Prejudice

It would be comical, were it not somewhat pathetic, the way newspaper offices are besieged by their friends, urging them to "report" this and that; to "see to it" that this and that is corrected; to have this or that done in the city or county. These friends actually appear to believe that it is the newspaper's business to handle all these affairs.

But a self-respecting newspaper, though ready and willing to carry all reasonable responsibility, must remind its readers that they too have a responsibility.

A self-respecting newspaper tries to report the news of what actually happens, not what it might wish had happened. The relation of a self-respecting newspaper to the general public is not always understood. It is the duty of a newspaper to be in a position to support any good act and criticize any bad act of public policy.

This relationship cannot exist where favors are asked and granted. Honesty is the only policy for a newspaper.

If objectors don't like the way things are going, they should qualify as voters, and then raise cash about it—Kitchener Record.

Demand For Binder Twine

Eastern Factory To Increase Plant Capacity By 20 Per Cent.

Anticipating increased demand for binder twine due to a predicted heavy wheat crop this year in Canada, the Plymouth Cordage Company of Wexford, has installed new machinery to increase plant capacity by 20 per cent, and started a night shift. Employment for 200 additional men will be given.

New Construction Brick

A new construction brick, having a high fusion point and almost no shrinkage, has been perfected. Material used for the brick was Georgia kaolin, a pure form of white clay.

Overcoming Danger Of Lightning To Airplanes

Process Known As "Bonding" Has Been Proved Effective

British aeronautical engineers have succeeded in overcoming danger to aircraft and passengers from lightning to such an extent that a "plane may be struck while in flight and remain practically undamaged to continue its journey."

A process known as "bonding" in which all metal parts of the machine are connected into a continuous conductor prevent heavy charges of static electricity, such as are picked up in storm clouds, from blowing the "plane apart."

"Horatius," an Imperial Airways airplane, was recently struck by lightning while flying over Kent on his way to Paris. Although some of the windows were blown out, no occupant was hurt and the pilot was able to turn back to London and transfer his passengers to another "plane which took them at once to their destination."

Hint For the Cook

Expert Says "Pinch" Should Be Weighed For Best Results

Many a tasty dish would be just a little tastier, and many a sauce would be just a little less and it cooks would make some effort to standardize their "pinch," said Max Werder, assistant viceroy of the Canadian National Steamships, who is in charge of his hotel's housewives. Mr. Werder advises all cooks to measure their fingers and weigh their "pinch" capacity so that a "pinch of salt" or a "small pinch of cayenne pepper" will become terms of measurement. He says the former amount should be a quarter of an ounce and the latter a sixteenth of an ounce.

Silk Hat Trade Declining

Demand Falling Off And No Apprentices Being Trained

Denton, the Little Lancashire town, famed for manufacture of silk hats, fears that the trade is doomed.

No apprentices are being encouraged to enter this particular branch of the hat manufacturing business, and all workmen at present employed are skilled craftsmen, who are getting on in years.

The world demand for silk hats is said to have fallen to about six dozen a week, most of which are manufactured in Denton.

The Line Is Busy

But Chinese Have Most Polite Way Of Saying So

In China, when a subscriber rings up the telephone exchange the operator asks: "What number does the honorable son of the moon and stars desire?" After a short silence the exchange operator will tell the subscriber person graciously forgive the inadequacy of the insignificant service and permit this humble slave of the wire to inform him that the never-to-be-sufficiently censured line is engaged."

Stockyards For The Psa

Cattle shipped over the Hudson Bay Railway for export through the port of Churchill will be fed and watered at The Psa, it has been definitely learned. Construction of stockyards will begin here at once.

At least one cattle shipment will be made to Great Britain over the northern route this year.

Terribly Inconsiderate

According to an official, says London Punch, the offices of income-tax collectors are so scantily furnished that it isn't possible to ask taxpayers to take a seat. Nor is there any accommodation for those who faint.

Tired All Day Long

Mother and Daughter Both Praise Dr. Williams' Pink Pills For Restoring Vigour

"Being rundown, I was not able to do my work; I had no sleep, and could not sleep at night," writes Mrs. Reuben A. Grafton, Ont.

"I saw an advertisement for Dr. Williams' Pink Pills. Trying two boxes, I got relief right away; so I kept on taking the Pills, and how I am able to do my work with pleasure, and I have no ailments whatever."

Mrs. Anna Ament, says: "My daughter was run down. Every one thought she was going into a decline. I gave her Dr. Williams' Pink Pills, and I saw her success immediately."

Don't allow yourself or your daughter to be robbed of health and vigour. Take Dr. Williams' Pink Pills. They banish rundown or nervous conditions by creating new red blood cells, which purify the blood and vitality. Get a supply at your druggist's. In the new glass container—50c.

To Keep Slender You Must Be Clean Inwardly

Let ENO keep you well regulated and you will have the normal, slender body nature intended for you. ENO'S "Fruit Salt" will keep the body normal by ridding the intestinal tract of poisonous waste matter. Be ENO conscious. ENO is the safe, sure way to normal health—and slenderness.

Punctuality Is Amazing

Birds and Fish Seem To Have Extraordinary Time Sense

Some birds certainly have a sense of time. Observations made at Barton Abbey, England, in the month of June prove that the lark is definitely the first to sing in the morning. This at two minutes after three. Next comes the thrush, third the sedge warbler, fourth the blackbird. Then in order the reed bunting, robin, cuckoo, willow-wren, rook and garden warbler. The whole list is too long to give, but the same order was kept faithfully, morning after morning, ending with the tree creeper which did not sound its note until four thirty-seven.

Great shoals of a delicious little fish arrive yearly off the coasts of Samoa on the same day in the same month, with such regularity that, from time to time out of mind, the day has been set apart by the natives as a holiday and a feast day. The shoals take twenty-four hours in passing, then they are not seen again until the same day the following year. There is no explanation of the amazing punctuality of their yearly visit.

First evidence that prehistoric natives of British Columbia knew the surgical technique of trephining—cutting a piece of bone out of the skull—was found recently when a skull bearing marks of this operation was unearthed.

Peasant shells as material for cellulose are favorably reported upon, after experiments.

THE RHYMING OPTIMIST

By Aline Michellie

HEART OF GOLD

Life is a flower with a golden heart; Though petals after petals drop away As one by one the swift-winged years depart.

Still something of its charm and fragrance stay.

As ever wider open falls the rose, Still heavier, more potent grows its scent, And nature's new loveliness the hours disclose.

Surpassing speech, yet strangely eloquent

A flower is life; yet, as youth's petals fall, And flying years reach out with Time is defrauded; he cannot take all But only graces valued overmuch:

For not until the final leaves unfold Does it reveal its matchless heart of gold.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong, speedy Mother's Friend Worm Exterminator.

New Motor Law

Financial Responsibility Insurance Legislation Soon Effective In B.C.

British Columbia's new automobile insurance legislation, passed at the last session of the legislature, will come into effect September 1. It was announced following a session of the cabinet when an order-in-council was passed fixing the date in conformity with Ontario and other provinces in the Dominion having similar legislation. The new legislation is known as financial responsibility insurance, and the object is to eliminate from the streets and highways irresponsible drivers of motor vehicles.

A Real Sport

It happened in front of the Palace. Two lay-ops were chewing the rag.

"What're doing, tonight?" asked one. "How about taking in a movie? I'll take our minds off the depression."

"Sorry, old man," was the answer. "But I can't make it. I've got a bridge date."

"That's okay, too," was the amazing reply. "I'll jump off with you."

Little Helps For This Week

"Great peases have they which love Thy law."—Psalms cxix. 165.

Dear Lord and God, incline Thine ears unto my call; O grant me that in all, This will of mine May still be one with Thine!

Teach me to answer still, Whatever my lot may be, To all Thy sweetest will, Of good or ill, All goeth as God will.

—Alice Williams.

The root of all dissatisfaction and discontent with self, and with one's surroundings, and with one's prospects, can never be reached until we go down to the will of God in our souls' birth and soul's mission, and make the discovery of that will for us, and the doing it our chief aim and hope. No change in life's circumstances, no larger work, no happier outlook will be enough. We ourselves need to be born again; it is not our outward life that needs to be refashioned.—Newman Smyth.

Know Surgical Technique

First evidence that prehistoric natives of British Columbia knew the surgical technique of trephining—cutting a piece of bone out of the skull—was found recently when a skull bearing marks of this operation was unearthed.

Peasant shells as material for cellulose are favorably reported upon, after experiments.

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

MUCH PREFER APPLEFORD WONDER PAPER

With so much inventive thought being given to eliminating unnecessary household work, it is only natural that a worthwhile substitute for the dusty dust cloth should be sought.

Now it has been found! Appleford Wonder Paper which actually dusters—as it cleans—as it polishes is receiving a hearty welcome from Canadian women who detest dust cloths and all they stand for.

Wonder Paper is made from clean rags and soft paper pulp, thoroughly impregnated with a high-grade furniture polish, and absorbs dirt instead of spreading it. Appleford Wonder Paper comes in handy-size packages, twenty-five sheets, each as large as a dust waft, and so over the surface requiring attention.

You'll be amazed at the quick and lasting finish Wonder Paper gives. When one side is worn and faded, simply turn the Wonder Paper inside out. After the furniture or woodwork has been gone over, you can still use your Wonder Paper on the floors.

And when you're through—throw it away. No dust, no shake, or wash. No fuss, no bother at all. The most obnoxious part of housework done in half the time and with half the effort. Doesn't the idea appeal to you?

Special Offer

Wonder Paper is made by the makers of the famous PARASOL heavy waxed paper in the Green Box. Most grocery hardware and department stores sell Appleford Wonder Paper. If you cannot find it, write to the company and we'll give you a new and unique booklet entitled "Leftovers," containing one hundred recipes, as a bonus for your Wonder Paper.

Applied Paper Products, Ltd., Hamilton, Ontario.

Enclosed 25c for which please send me one full-size package of WONDER PAPER and your 100 recipes for "Leftovers."

Calgary Stampede
Local Winners on Monday

Angus Robertson won second money in the Canadian Championship Cal Roping Contest. Time 25 4-5 seconds.

Joe Grey of Dog Pound was tied with Guy Weadick Soldier of Morley for first money in the Boys' Wild Steer Riding Contest, and split first and second money.

Chas. (Dad) Moore won a heat of the Chug Wagon Race.

Bush League Baseball
Madden Wins from Dog Pound and Water Valley

On Thursday of last week, Dog Pound and Madden hooked up in what proved to be the best game of the season. Madden winning out by a score of 4-3. At the end of the seventh the score was 1 to 0.

Both teams played heads-up baseball and their snappy fielding would make some of these highly touted Calgary teams look like a bunch of hams.

Jimmie Williamson was on the bill for Dog Pound with Kid Banta on the receiving end; and Tom Borbridge and Ken Borbridge were the battery for the winners.

These two clubs who are fighting it out for the league leadership, will play at Madden on Sunday afternoon, July 17 at 2 o'clock.

Don't miss this game folks, as it is just as interesting as a Pittsburgh and Chicago game in the National League.

Madden journeyed to Water Valley on Saturday and finished the week with a perfect average by defeating George Day's Giants by a score of 12-7.

We are unable to publish the standing of the Bush League this week as we have no word from the official scorer, who is attending the Calgary Stampede, and when last seen was as tight as a drum.

Horseshoe Club

Jim McCool and Clarence Havens were successful in defending the McCool challenge cup on Saturday evening, when they defeated Jim and Chas. Aldred in a very close game by a score of 44 to 50.

The weekly tournament prizes were won by Jim Aldred and Wm. Holmes, first; C. Havens and Jim McCool, second.

Note—The next tournament will be held on Sat. evening, July 23.

ONEIL SCHOOL ENJOY PICNIC

The pupils and the residents of Oneil School spent an enjoyable day on St. Georges Island, Calgary on July 30. The teacher Miss McEwan saw that every one had a big day. Races for all caused much merriment the children and the grown-ups had all the ice cream, candy, etc. that they required, to speak the truth, most of them were in agony for a while.

A beautiful picnic lunch was served at 12.30.

Departure took place about 5 p. m. Mr. Smart took a truck load of children and many thanks were given him.

LOST—Ladies Brown Handbag containing sum of money and cream cheese stubs. Lost between T. Mai's farm and town. Finder will please return to Chronicle office and receive reward.

Mrs. Bartholemew

The building of the highboard fence at the nuisance grounds has been delayed on several occasions owing to wet weather, but the weather is fine and the Board of Trade should lose no time in getting this work done. The Council purchased the lumber weeks ago. Let's get busy.

The following officers of the Justice Rebekah Lodge No. 62 were installed by the District Deputy President and staff of Bowden on Monday evening.

Mrs. C. Richardson, N. G.; Mrs. Thompson, Sr. V. G.; Mrs. S. Willis, R. S.; Mrs. Chas. Fox, F. Sec.; Mrs. Wm. Pogue, Treasurer.

Mr. Watkin and family of Shalbrook, Sask. were visiting at the home of Mr. and Mrs. Fitzpatrick on Wednesday. They are on their way to Banff.

Mrs. Fitzpatrick and daughters left on Wednesday to spend two weeks camping at Sylvan Lake.

Rev. H. Young left on Monday to spend the week at the Tuxis camp, Sylvan Lake.

R. M. McCool, M.L.A. addressed a well attended meeting at Weeden School on Saturday evening last. Mr. McCool gave a summary of the work done at the last session.

The C. G. I. T. held an Oriental tea in the park on Saturday evening. The girls in their pretty kimono, and the tea tables among the trees, with colored lanterns overhead, was most beautiful. The evening was cold and the girls did not do the business they would have done had it been warm.

HAIL STORM DOES DAMAGE

The hail storm on Thursday last which caused damage to crops and gardens in the Carstairs district, took in a small strip north and east of Crossfield.

Among the local farmers who report from 5 to 40 percent damage are: C. Christianson, Ed. Donald, T. S. Ferguson, J. McCordie, John Hehr, Alex Weritz. Damage to gardens in this area is also reported. Mrs. Arnot's beautiful flower garden was badly damaged. A Hoffman who had visions of a barrel or two of sauerkraut for the winter, saw his hopes fade as hail stones as big as walnuts chewed up his cabbage patch.

The annual picnic of the Floral U. F. W. A. was held near the Tany-Bryn school on Wednesday last. A large crowd was present and everyone reports a good time.

Several softball games were played. Tany-Bryn and East Community playing a tie game. The big upset of the afternoon was the defeat of East Community by a picked up team of married men.

The usual foot races and a big picnic lunch brought to a conclusion another successful picnic.

For Sale—McCormick Binder 8 ft. cut, also 8 inch Grain Grinder. Thos. Fitzgerald, phone 351.

Mr. and Mrs. E. Hayes and children of Okotoks are visiting at the home of the latter's parents, Mr. and Mrs. F. Mossop.

Mrs. McClelland and family returned home from Sylvan Lake on Friday last. They left here intending to stay two weeks but owing to the disagreeable weather one week was sufficient.

The crossing from the sidewalk in front of Lau's residence to Calhoun's has been put in again following the grading of the street and has been set up away too high, making it dangerous for motor traffic.

Boys and girls don't overlook the U.F.A. "Popularity Contest" Valuable prizes are offered in this contest and you may be the lucky one. Read the ad. on page 1.

Mr. and Mrs. R. W. McFarlane of Bassano were visitors at home of Mr. and Mrs. M. Thomas on Sunday on their way back from Edmonton.

Glen Williams returned on Saturday from Bentley where he had spent the week at the home of his parents. Glen is spending the remainder of his holidays at the Calgary Exhibition. Between playing golf in the morning and the ponies in the afternoon, he will no doubt put in a busy week.

Archie McFadyen has gone out of the threshing business for good and last week disposed of his separator to Everett Bills who will use it for repairs. Archie blames Premier Bennett for the low price of grain and everything in general—even to there being no money in threshing.

School teachers of the schools in the district, are requested to send to the Crossfield Chronicle the list of results of recent midsummer examinations. These will be published.

W. Major and S. Collins are building the cement crossing running north of Wm. Lau's property to Dan Fike's. The council are of the opinion that wooden crossings are too costly to keep up and it is likely that all crossings in future will be of cement.

Al Hunter is leaving on Friday for Coroner to take over the management of the Midland-Pacific elevator there. Mr. Hunter has made many friends in Crossfield who will regret very much his leaving. Tom Green, well known in Crossfield and a former grain buyer here, arrives from Calgary on Thursday to take over the management of the Midland Pacific elevator.

Church of the Ascension (ANGLICAN)

Sunday, July 17th.
Evensong - 7.30 p. m.
Note—Morning Service on 2nd and 4th Sunday's.
Evening Service on 1st, 3rd, and 5th Sunday's.

The Crossfield Chronicle
ESTABLISHED 1907
Published at Crossfield, Alberta
